DISCLAIMER

Information and data contained in this document are based on input available at the time of preparation. Because the results may be subject to change, this document should not be construed to represent the official position of the U.S. Army Materiel Development and Readiness Command unless so stated by that command.

ABSTRACT

This report identifies and evaluates the functional interfaces determined necessary in the performance of each function/subfunction of the U.S. Army Materiel Development and Readiness Command portion of the Army International Logistics Program. The report discusses the interfaces in terms of those identified as valid and performing, interface duplications and voids, and those considered critical. The report also indicates the functional areas of the Army Logistics System into which the International Logistics Program functions/subfunctions are integrated or with which an interface is required.

PART I

EXECUTIVE SUMMARY

1. <u>Problem</u>: The International Logistics Program (ILP) within the U.S. Army Materiel Development and Readiness Command (DARCOM) is vigorous, highly interactive and integrated or interfacing with its corresponding functional areas of the Army Logistics System (ALS). Therefore, it requires unique and innovative management and control techniques. Although these techniques have been largely developed, they are significantly constrained by a lack of identification and definition of the many functional interfaces required to support accredited customers. ¹

2. Objectives:

- a. Portray the functions/subfunctions of the ILP.
- b. Indicate the functional areas of the ALS with which they are integrated.
- c. Identify and evaluate the interfaces required within each function/subfunction.
 - d. Specify interface duplications and voids.
 - e. Highlight the critical interfaces.
- 3. <u>Background</u>: The Logistics Studies Office (LSO), U.S. Army Logistics Management Center (ALMC), by letter, AMCPA-S, 14 Aug 75, subject: International Logistics Studies FY 76, was tasked to conduct a study of the problem outlined in paragraph 1 above. A study plan was submitted to the study sponsor (Director of IL) and the study sponsor representative was briefed concerning the study plan on 25 Nov 75. At the conclusion of the briefing, the study plan was approved and the study was initiated on 1 Jun 76.

- 4. Assumptions: None
- 5. <u>Purpose</u>: The purpose of the study is to provide the Director for International Logistics, HQ DARCOM/Commander, U. S. Army International Logistics Command (USAILCOM), with the identification and an evaluation of the functional interfaces required within and between each function/subfunction of the DARCOM ILP.

6. Conclusions:

- a. The interface voids existing in the DARCOM ILP are excessive either because of the function not being performed or the interfaces are not reflected in official documentation because of oversight.
 - b. Duplicate interfaces are negligible.
- c. The excessive interface voids and the high degree of interface criticality indicate a need to review mission and functions statements and the procedural documents within the DARCOM ILP.

7. Recommendations: It is recommended that:

- a. Appropriate staff elements of USAILCOM examine the nature and extent of interface voids identified in the study and take action to establish the interfaces in official documents.
- b. Action be taken to update all mission and functions manuals at the earliest practicable date.
- c. In accomplishing the update, ILP functions/subfunctions be standardized at all levels to provide visibility and improved management and control.

PART II

MAIN REPORT

- 1. Statement of the Problem: The International Logistics Program (ILP) within the U. S. Army Materiel Development and Readiness Command (DARCOM) is vigorous, highly interactive and integrated or interfacing with its corresponding functional areas of the Army Logistics System (ALS). Therefore, it requires unique and innovative management and control techniques. Although these techniques have been largely developed, they are significantly constrained by a lack of identification and definition of the many functional interfaces required to support accredited customers.²
- 2. <u>Limits and Scope</u>: This study is limited to the DARCOM ILP. However, this endeavor demanded consideration not only of the interfaces endogenous to DARCOM, but it also required an evaluation of the interfaces the system must establish with the many governmental departments, agencies and elements exogenous to DARCOM.

3. Discussion:

- a. Method
- (1) All applicatory and regulatory documents relative to the ILP were analyzed. This was followed by a complete background search of documents concerning previous efforts in the International Logistics subject area (DLSIE bibliography). Lastly, a detailed analysis was conducted of all mission and functions manuals published by HQ DARCOM, DARCOM Major Subordinate Commands (MSCs), and all other DARCOM commands/agencies/elements having ILP responsibilities.
 - (2) Based upon the analysis outlined in the preceding paragraph, the

functional requirements of the ILP were categorized for the purposes of this study as follows: 3

Category I - Program/System Management (Annex A)

Category II - Requests for International Logistics Planning Data (Annex B)

Category III - Case Development (Annex C)

Category IV - Financial Management (Annex D)

Category V - Case Management (Annex E)

Category VI - Materiel/Services Management (Annex F)

Category VII - Support Services (Annex 6)

(3) All interfaces considered necessary in the performance of the ILP functions/subfunctions could not be identified in the mission and functions manuals analyzed. The lack of such identification necessitated the application of judgment by the study team members to identify the additional functions considered necessary in the ILP. These judgments were based on an evaluation of the nature of each function/subfunction in relation to the ILP functional responsibilities of each organization/element internal to or outside DARCOM.

b. Results

(1) The functions/subfunctions of the ILP in each functional category listed in the preceding paragraph are portrayed in flow chart format in the annexes of this report. Format construction reflects each function and subfunction of the ILP in the top flow symbols with the corresponding ALS functions with which integrated or requiring a functional interface shown numerically in the diamond-shaped symbol immediately below each ILP function/subfunction. The corresponding ALS functions and the numerals assigned

to each are listed on the left of each flow chart.

(2) Each interface required within a function/subfunction of the ILP is identified in matrix format. The ILP functions/subfunctions are listed on the left of each matrix and the interfacing organizations/elements are shown on the horizontal heading. The interfaces are identified by an X, D, O, or numeral. Numerals are used to indicate specific DARCOM MSCs.

Matrix Legend:

- X Valid and performing interface
- D Duplicate interface
- 0 Interface void
- 1 ARMCOM
- 2 AVSCOM
- 3 ECOM
- 4 MICOM
- 5 TARCOM
- 6 TROSCOM

Underlined entries:

- \underline{X} , $\underline{0}$, $\underline{1}$, $\underline{2}$, $\underline{3}$, etc. Critical interfaces
- (3) A narrative developed for each functional category listed in paragraph 3a(2) lists the following data:
 - (a) Purpose of the annex.
 - (b) General comments.
 - (c) A discussion which defines and evaluates each interface.
 - (d) Lists all interface voids.
 - (e) Identifies all critical interfaces.

c. Analysis

- (1) Although all interfaces identified as necessary by the study effort could not be validated in the mission and functions manuals analyzed, it is strongly suspected that they may be established and are being performed.
- (2) As pointed out in a previous LSO study, the lack of standardization and the verbose and equivocal language of the mission and functions manuals severely constrains visibility and understanding of the ILP throughout DARCOM. In turn, the lack of procedural standardization throughout the DARCOM ILP seems to be reflected in the excessive interface voids identified.
- (3) The analysis of all available documentation relative to the DARCOM ILP identified 3,663 interfaces as necessary in the performance of each functional category evaluated. Within this total, 2,282 (62%) were found to be valid and performing while 1,381 (38%) interface voids were identified. The analysis also revealed 3,201 (87%) of the interfaces judged to be critical in the operation of the ILP.
- (4) Duplicate interfaces were negligible, with only 16 being identified. Therefore, duplicate interfaces were not included in the evaluation.
- (5) The analysis of the mission and functions manuals and other procedural documents revealed a significant number of interface voids in all functional categories. The voids range from a low of 29% within Category I (Program/System Management) to a high of 54% in Category V (Case Management).
- (6) Table 1 contains an ILP interface summary by functional category and Figure 1 reflects the ILP interfaces as a percentage of total functions by category.

INTERNATIONAL LOGISTICS PROGRAM INTERFACE SUMMARY BY FUNCTIONAL CATEGORY

FIGURE 1

INTERNATIONAL LOGISTICS PROGRAM INTERFACES AS A % OF TOTAL FUNCTIONS BY CATEGORY

4. Conclusions:

- a. The interface voids existing in the DARCOM ILP are excessive either because of the function not being performed or the interfaces are not reflected in official documentation because of oversight.
 - b. Duplicate interfaces are negligible.
- c. The excessive interface voids and the high degree of interface criticality indicate a need to review mission and functions statements, and the procedural documents within the DARCOM ILP.

5. Recommendations: It is recommended that:

- a. Appropriate staff elements of USAILCOM examine the nature and extent of interface voids identified in the study and take action to establish the interfaces required in official documents.
- b. Action be taken to update all mission and functions manuals at the earliest practicable date.
- c. In accomplishing the update, ILP functions/subfunctions be standardized at all levels to provide visibility and improved management and control.

NOTES

Executive Summary

1. LSO Project 612, Organizational Missions, Functions and Procedures Used in Support of the DARCOM International Logistics (IL).

ANNEX A

Functional Category I

TITLE: Program/System Management

- 1. <u>Purpose</u>: This annex contains the functions/subfunctions considered necessary to fulfill the Program/System Management aspects of the DARCOM International Logistics Procedure. The functions of the Army logistics system into which they are integrated or require interface are contained in Appendix 1. Appendix 2 is a matrix presenting the interfaces considered necessary in the performance of each function/subfunction.
- 2. General: The functions identified and evaluated in this annex are:
 - a. Planning (Block 1.0)
 - (1) Establishment of objectives and programs
 - (2) Development of plans
 - (3) Coordination of plans
 - b. Organizing/Policy (Block 2.0)
 - (1) Development of organization/policy
 - (2) Implementation of organization/policy
 - c. Controlling (Block 3.0)
 - (1) Establishing standards
 - (2) Evaluation of performance
 - (3) Correction of deficiencies

3. <u>Discussion</u>:

- a. Planning (Block 1.0)
- (1) <u>Description</u>. This function encompasses IL planning throughout the DARCOM. It includes: (1) all mid and long range planning, (2) the coordination and integration of such plans into DARCOM counterpart plans,

- (3) the establishment of planning guidance and the provision of such guidance to all elements of DARCOM concerned with IL, and (4) the coordination of plans and planning activities with appropriate agencies within and outside DARCOM which impact IL.
- (2) Responsibility. The Commander, USAILCOM (Director for Plans, Systems and Analysis, WFO), has the primary responsibility for IL planning within DARCOM. He, in turn, supervises and coordinates IL planning throughout DARCOM, and coordinates IL planning with appropriate agencies/elements outside DARCOM.
- (3) <u>Interfaces</u>. One hundred ten (110) interfaces have been identified as necessary within the IL planning function.
- (a) <u>Valid Interfaces</u>. Seventy-four (74) interfaces within this function were identified as established and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Within the interfaces identified, thirty-six (36) were voids. The voids are listed below.
 - 1 U.S. Army Medical Materiel Agency
 - 2 Associate Director for Maintenance, HQ DARCOM
 - 3 Director for Development and Engineering, HQ DARCOM
 - 4 Command Counsel, HQ DARCOM
 - 5 Director for Personnel, Training and Force Development, HQ DARCOM
 - 6 Operations Control Office, USAILCOM
- $\underline{7}$ Director for Transportation and Traffic Management Operations, NCAD, USAILCOM
 - 8 Major Subordinate Commands

- 10 Development Centers
- 11 General Services Administration
- (d) <u>Critical Interfaces</u>. All interfaces identified in this function are considered critical.
 - b. Organizing/Policy (Block 2.0)
- (1) <u>Description</u>. This function is concerned with: (1) the responsibility to establish policy for the IL mission, (2) the organization of staff and operating elements within the DARCOM into a cohesive body to fulfill the IL mission, and (3) the implementation of organization/policy.
- (2) <u>Responsibility</u>. The Commander, USAILCOM (Director for Plans, Systems and Analysis, WFO), has the responsibility for IL organization/policy within DARCOM.
- (3) <u>Interfaces</u>. Within this function, ninety-two (92) interfaces were identified as necessary to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. The analysis revealed sixty-six (66) interfaces are established and are being performed.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Twenty-six (26) of the interfaces identified within this function were considered voids. The interface voids are outlined below.
 - 1 Associate Director for Maintenance, HQ DARCOM

- 2 Director for Development and Engineering, HQ DARCOM
- 3 Director for Management Information Systems, HQ DARCOM
- 4 Director for Personnel, Training and Force Development, HQ DARCOM
- 5 Director for Transportation and Traffic Management, NCAD, USAILCOM

- (d) <u>Critical Interfaces</u>. All interfaces within this function are considered critical.
 - c. Controlling (Block 3.0)
- (1) <u>Description</u>. This function is concerned with the control of the DARCOM IL mission and its performance. Included in the function are:
- (1) the requirements to establish standards for the IL procedure, (2) evaluation of procedure performance, and (3) correction of deficiencies within the system.
- (2) <u>Responsibility</u>. The Commander, USAILCOM(Director for Plans, Systems and Analysis, WFO), has the primary responsibility for this function. He exercises this responsibility in coordination with appropriate HQ DARCOM staff elements, major subordinate commands, other DARCOM elements/activities, and with other agencies such as the DOD, DSAA, DA, etc.
- (3) <u>Interfaces</u>. Eighty-six (86) interfaces were identified as necessary to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. Sixty-five (65) interfaces were identified as established and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Twenty-one (21) interface voids were identified. Listed below are the interface voids.

ANNEX B

Functional Category II

TITLE: Request for IL Planning Data

- 1. <u>Purpose</u>: This annex lists the functions/subfunctions selected as necessary to fulfill requests for International Logistics Planning data. The functions of the Army Logistics System into which the functions/subfunctions are integrated or have interface are contained in Appendix 1. The interfaces considered necessary in the performance of each function/subfunction are presented in Appendix 2.
- 2. General: The functions and subfunctions evaluated in this annex are:
 - a. Planning Data Request (Block 1.0)
 - b. Receive Request for Planning Data (Block 2.0)
 - (1) Validate country accreditation (Block 2.1)
 - (2) Validate Item/Service Need (Block 2.2)
 - (3) Determine Commercial Availability of Item/Service (Block 2.3)
 - (4) Refer request to appropriate agency (Block 2.4)
 - c. Process Request (Block 3.0)
 - (1) Research price and availability data (Block 3.1)
 - (2) Prepare price and availability data (Block 3.2)
 - (3) Prepare support data (Block 3.3)
 - (4) Validate price and availability and support data (Block 3.4)
 - (5) Consolidate data by case (Block 3.5)
 - (6) Review case (Block 3.6)
 - d. Submit Price and Availability Data to Washington Field Office(Block 4.0)
 - e. Reply to Request (Block 5.0)

f. Direct reply to MAAGS and Missions if request originated therefrom. (Block 6.0)

3. Discussion:

- a. Planning Data Request (Block 1.0)
- (1) <u>Description</u>: The planning data requests normally originate with the interested country. However, MAAGs and Missions and Unified Commands may make the request for the country. Planning data requests furnish eligible foreign governments timely data on which to plan for their requirements.
- (2) <u>Responsibility</u>: The country is responsible for the planning of its defense efforts and the allocation of available resources.
 - (3) Interfaces:
- (a) <u>Valid Interfaces</u>. Four (4) interfaces were identified as valid and performing within this function.
 - (b) <u>Duplicate Interfaces</u>. None
 - (c) <u>Voids</u>. None
 - (d) <u>Critical Interfaces</u>. DSAA
 - b. Receive Request for Planning Data (Block 2.0)
- (1) <u>Description</u>: This function concerns receiving the request for planning data and provides for centralized control of requests.
- (2) <u>Responsibility</u>: The responsibility of receiving requests for planning data is delegated to the Commander, USAILCOM (Director for Program Operations, NCAD).
 - (3) Interfaces:
- (a) <u>Valid Interfaces</u>. Two (2) interfaces were identified as valid and performing within this function.
 - (b) <u>Duplicate Interfaces</u>. None

- (c) Voids. None
- (d) <u>Critical Interfaces</u>. Director for Regional Management, WFO, USAILCOM

 Director for Program Operations, NCAD, USAILCOM
- c. Validate Country Accreditation (Block 2.1)
- (1) <u>Description</u>: This subfunction concerns the validation of the foreign government as eligible to receive grant aid or to purchase items under the Foreign Military Sales Program.
- (2) <u>Responsibility</u>: The Commander, USAILCOM, (Director for Regional Management, WFO) has the responsibility to validate country accreditation.
 - (3) Interfaces: No interfaces are required for this subfunction.
 - d. Validate Item/Service Need (Block 2.2)
- (1) <u>Description</u>: This subfunction concerns the determination that a need and authority exists in the force structure of the Foreign Government requesting the item.
- (2) <u>Responsibility</u>: The Commander, USAILCOM (Director for Regional Management, WFO) has the responsibility to validate item/service need.
 - (3) Interfaces: No interfaces are necessary for this subfunction.
 - e. Determine Commercial Availability of Item/Service (Block 2.3)
- (1) <u>Description</u>: This subfunction involves the determination of whether the item on which price and availability data has been requested is available from commercial sources. If the item is available commercially, the requestor is advised to purchase the item direct under approved procedure.
- (2) <u>Responsibility</u>: The Commander, USAILCOM (Director for Regional Management, WFO) has the responsibility for this subfunction.
 - (3) Interfaces. No interfaces are required to perform this subfunction.

- f. Refer Request to Appropriate Agency (Block 2.4)
- (1) <u>Description</u>: This subfunction involves forwarding the request for planning data to the supply source responsible for the items to develop the data requested.
- (2) <u>Responsibility</u>: The responsibility for this subfunction is delegated to the Commander, USAILCOM (Director for Regional Management, WFO).
 - (3) Interfaces: No interfaces are required for this subfunction.
 - g. Process Request (Block 3.0)
- (1) <u>Description</u>: This function provides for the complete processing of the request for planning data within the appropriate commands/elements/agencies of DARCOM.
- (2) <u>Responsibility</u>: The responsibility to process requests is delegated to the major subordinate commands.
- (3) <u>Interfaces</u>: Sixty-nine (69) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Sixty-five (65) interfaces were identified as valid and performing within this function.
 - (b) Duplicate Interfaces. None
 - (c) <u>Voids</u>. Four (4) interface voids were identified.
 - 1 Other Military Services
 - 2 U. S. Army Medical Materiel Agency
 - 3 DSA
 - 4 GSA
 - (d) Critical Interfaces.

- 7 Director for Regional Operations, NCAD, USAILCOM
- 8 All elements of the MSC's indicated in the matrix.
- 9 GSA
- h. Research P&A Data (Block 3.1)
- (1) <u>Description</u>: This subfunction involves the research necessary to provide current price and availability data relative to the items requested by the foreign government.
- (2) <u>Responsibility</u>: The responsibility for research P&A data is delegated to the appropriate staff elements of the command/agencies/elements of the DARCOM Major Subordinate Commands.
- (3) <u>Interfaces</u>: Sixty (60) interfaces were identified as necessary within this subfunction.
- (a) <u>Valid Interfaces</u>. The analysis identified thirty-five (35) interfaces as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
 - (c) Voids. Twenty-five (25) interface voids were identified.

- 1. Consolidate Data by Case (Block 3.5)
- (1) <u>Description</u>: This subfunction concerns the consolidation of the various P&A support data elements developed by the various staff elements of the Major Subordinate Commands into appropriate cases.
- (2) <u>Responsibility</u>: The responsibility for consolidating data by case is delegated to the Directors of International Logistics at the Major Subordinate Commands.
 - m. Review Case (Block 3.6)
- (1) <u>Description</u>: This subfunction involves case review subsequent to preparation and validation of price and availability data as well as support data.
- (2) <u>Responsibility</u>: The responsibility for case review is delegated to the Directors of International Logistics at the Major Subordinate Commands.
- (3) <u>Interfaces</u>: Fifty-eight (58) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. Twenty-five (25) interfaces were identified as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
 - (c) Voids. Thirty-three (33) interface voids were identified.

- 4 GSA
- 5 Other Military Services
- (d) <u>Critical Interfaces</u>. All interfaces identified for this subfunction are considered critical.
 - n. Submit P&A Support Data to WFO (Block 4.0)
- (1) <u>Description</u>: This function concerns the forwarding of completed P&A support data to the WFO, USAILCOM.
- (2) <u>Responsibility</u>: The responsibility for this function is delegated to the Director of International Logistics at each MSC.
- (3) <u>Interfaces</u>: Ten (10) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. Six (6) interfaces were identified as valid and performing.
- (b) <u>Duplicate Interfaces</u>. Two (2) interface duplications were identified: Director **6**f Materiel Management, MICOM and TROSCOM.
 - (c) Voids. Four (4) interface voids were identified.

- 1 U.S. Army Medical Materiel Agency
- 2 DSA
- 3 Director of International Logistics, TARCOM
- 4 GSA
- (d) <u>Critical Interfaces</u>. The following interfaces are critical to this function:
 - 1 U.S. Army Medical Materiel Agency
 - 2 DSA
 - 3 Director for Program Operations, NCAD, USAILCOM
 - 4 Director for International Logistics at all MSCs
 - 5 GSA
 - o. Reply to Request (Block 5.0)
- (1) <u>Description</u>: This function concerns the official reply to requests for planning data.
- (2) <u>Responsibility</u>: The Commander, USAILCOM, Director for Regional Management, WFO, is delegated the responsibility for this function.
 - (3) Interfaces: No interfaces are considered necessary for this function.
- p. <u>Direct Reply to MAAGS & Mission if Request Originated Therefrom</u>
 (Block 6.0)
- (1) <u>Description</u>: This function concerns the direct reply to a MAAG or mission if the request is received from those sources.
- (2) <u>Responsibility</u>: The Commander, USAILCOM, is responsible for replies to IL planning data requests. This responsibility is delegated to the Director of Regional Management, WFO.
- (3) <u>Interfaces</u>: Fourteen (14) interfaces were identified as necessary within this function.

- (a) <u>Valid Interfaces</u>. Nine (9) interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
 - (c) Voids. Five (5) interface voids were identified.
 - 1 DSA
 - 2 Other Military Services
 - 3 U.S. Army Medical Materiel Agency
 - 4 Director for Program Operations, NCAD, USAILCOM
 - 5 GSA
- (d) <u>Critical Interfaces</u>. The following interfaces are of critical importance to the conclusion of this function.
 - 1 DSA
 - 2 Other Military Services
 - 3 U.S. Army Medical Materiel Agency
 - 4 Director for Regional Management, WFO, USAILCOM
 - 5 Director for Program Operations, NCAD, USAILCOM

ANNEX C

FUNCTIONAL CATEGORY III

TITLE: Case Development

- 1. <u>Purpose</u>: This annex contains the functions/subfunctions selected as necessary in the development of a foreign military sales case. The Army Logistics System functions with which an interface is required, or into which the International Logistics program functions/subfunctions are integrated, are indicated in Appendix 1. Appendix 2 reflects the interfaces considered necessary in the performance of each function/subfunction.
- 2. <u>General</u>: The functions selected as necessary to fulfill the functional requirements are:
 - a. Assignment of a case designator (Block 1.0)
 - Posting of the DOD offer/acceptance control ledger (Block 2.0)
 - c. Establishment of the case file (Block 3.0)
 - d. Development of price, availability, and support data (Block 4.0)
 - e. Preparation of the letter of offer and acceptance (Block 5.0)
 - f. Coordination of the letter of offer and acceptance (Block 6.0)
- g. Signature for the letter of offer and acceptance by an authorized U.S. representative (Block 7.0)
- h. Forwarding of the letter of offer and acceptance to the Washington Field Office, USAILCOM (Block 8.0)
- i. Review and coordination of the letter of offer and acceptance
 (Block 9.0)
 - j. Approval of the letter of offer and acceptance (Block 10.0)
- k. Dispatch of letter of offer and acceptance to the FMS customer (Block 11.0)

- 1. <u>Customer acceptance of the letter of offer and acceptance as</u>
 written or as changed, and return to Washington Field Office, USAILCOM
 (Block 12.0)
- m. <u>Customer non-acceptance of the letter of offer and acceptance - classe case file and update the DOD offer/acceptance control ledger</u>

 (Block 13.0)

3. Discussion:

- a. Assignment of a case designator (Block 1.0)
- (1) <u>Description</u>. This function concerns the receipt of a FMS case request within the DARCOM and the assignment of the official case designator.
- (2) <u>Responsibility</u>. The Commander, USAILCOM (Director for Regional Management, WFO), has the responsibility of receiving FMS case requests.
- (3) <u>Interfaces</u>. The only activity involved in this function is the Director of Regional Management, USAILCOM, WFO. Normally, the FMS case is received from DSAA. Therefore, no voids or duplications were identified. Criticality of the interface is obvious.
 - b. Post DOD Offer/Acceptance Control Ledger (Block 2.0)
- (1) <u>Description</u>. This function involves the posting of the DOD offer/acceptance control ledger.
- (2) <u>Responsibility</u>. The Commander, USAILCOM (Director for Regional Management, WFO) has the responsibility for this function.
 - (3) Interfaces. No interfaces are involved in this function.
 - c. Establish case file (Block 3.0)
- (1) <u>Description</u>. This function concerns the establishment of case file by each DARCOM major subordinate command and staff elements thereof, other commands, elements, or activities participating in the development of an FMS case.

- (2) <u>Responsibility</u>. Each DARCOM command, element or activity involved in the development of an FMS case has the responsibility in this function.

 Overall control of this function rests with the Commander, USAILCOM (Director for Regional Management, WFO).
- (3) <u>Interfaces</u>. Sixty-two (62) interfaces were identified to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. Twenty (20) interfaces were identified as valid and performing.
 - (b) Duplicate: Interfaces. None
- (c) <u>Voids</u>. Forty-two (42) interface voids were identified. The voids are listed below:
 - 1 DSA
 - 2 USA MED Materiel Agency.
 - 3 Major Subordinate Commands

- (4) <u>Development Centers</u>
- (5) General Services Administration
- (d) Critical Interfaces. All interfaces identified are considered critical.
- d. Develop P&A and Support Data (Block 4.0)
- (1) <u>Description</u>. This function concerns the development of P&A and support data for items on an approved request from an accredited foreign country. These data are used in the formal letter of offer and acceptance. The DARCOM MSC's are involved in this function. Additionally, other agencies such as DSA, GSA, USA Medical Materiel Agency, and other military services who supply items for FMS are also involved in this function.
- (2) Responsibility. The Commander, USAILCOM (Director for Program Operations, NCAD) has the responsibility to insure that P&A/support data are developed by the agency/organization/element having commodity management for each item requested by an IL customer. However, the direct responsibility for the development of the data rests with the agency/organization/element having the commodity management assignment.
- (3) <u>Interfaces</u>. The analysis revealed sixty (60) interfaces were necessary to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. Thirty-six (36) of the interfaces were determined to be valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None

| · | | |
|------|----------|---|
| · | (c) | <u>Voids</u> . Twenty-four (24) interface voids were identified. Listed |
| belo | S WC | are the interface voids. |

- 5 Development Centers
- 6 General Services Administration
- d. <u>Critical Interfaces</u>. Because of the importance of the development of P&A/support data to the IL FMS cases, all interfaces identified are considered critical.
 - e. Prepare letter of Offer and Acceptance (Block 5.0)
- (1) <u>Description</u>. This function concerns the preparation of the formal letter of offer and acceptance (DD Form 1513) after all pertinent data relative thereto has been developed, validated, and consolidated. The output of this function is the formal letter of offer and acceptance for review and approval at the Washington level.
- (2) Responsibility. The Commander, USAILCOM (Director of Regional Operations, NCAD) has the responsibility to insure that letters of offer and acceptance are prepared. However, the actual preparation of the letter is the direct responsibility of the major subordinate command or other elements/agencies having commodity management responsibility for the items requested by the IL customer.
- (3) <u>Interfaces</u>. Seven (7) interfaces were identified as necessary in the accomplishment of this function.

- (a) <u>Valid Interfaces</u>. Seven (7) interfaces were determined valid and performing.
- (b) <u>Duplicate Interfaces</u>. The analysis revealed three (3) interfaces to be duplicative:
 - : 1 ECOM Director of Materiel Management
 - 2 MICOM Director of Materiel Management
 - 3 TROSCOM Director of Materiel Management
- (c) <u>Critical Interfaces</u>. All interfaces identified for this function are considered critical.
 - f. Coordinate Letter of Offer and Acceptance (Block 6.0)
- (1) <u>Description</u>. This function is a revalidation of the P&A/support data contained in the letter of offer and acceptance. It concerns each element within the DARCOM major subordinate command/elements/agencies who prepared P&A/support data for the letter of offer and acceptance. Additionally, this function insures that the most current cost factors and assessorial charges are included in the letter of offer and acceptance.
- (2) <u>Responsibility</u>. The responsibility for coordinating a letter of offer and acceptance is delegated to the Director of International Logistics of the major subordinate commands.
- (3) <u>Interfaces</u>. Sixty-eight (68) interfaces were identified as necessary to fulfill this functional responsibility.
- (a) <u>Valid Interfaces</u>. Forty-three (43) of the interfaces were determined to be valid and performing.
 - (b) Duplicate Interfaces. None
 - (c) Voids. Twenty-five (25) voids exist within this function. Listed

below are the voids:

1 Major Subordinate Commands

ARMCOM

Director of Maintenance

Comptroller

Director of Management Information Systems

AVSCOM

Director of RD&E

Director of Management Information Systems

ECOM

Director of Maintenance

Director of RD&E

Legal Counsel

Director of Management Information Systems

Project Managers

Special Items Management Office

MICOM

Director of RD&E

Legal Counsel

Director of Management Information Systems

Special Systems Management Office

TARCOM

Director of Maintenance

Director of RD&E

Legal Counsel

Director of Management Information Systems

Director of Product Assurance

TROSCOM

Director of RD&E

Project Managers

Special Item Management Office

- 2 Development Centers
- 3 Logistics Assistance Offices
- (d) <u>Critical Interfaces</u>. Due to the highly important nature of this function, all interfaces identified are considered critical.
 - g. Signature of Authorized U. S. Representative (Block 7.0)
- (1) <u>Description</u>. Authorized signatures required for letters of offer and acceptance vary with the dollar amount of the case. Therefore, the commanders of the major subordinate commands and the Directors of IL are listed as interfaces. Additionally, the Director for Regional Management, WFO, USAILCOM, is shown as an interface for signature of the letters of offer and acceptance if the dollar value of the FMS case exceeds the limitations imposed on the MSCs for signature. If necessary, the Director of Regional Operations refers the case to appropriate higher levels for signature based on the dollar value of the case.
- (2) <u>Responsibility</u>. In compliance with the FMS case dollar value requirements, the responsibility within this function is delegated to the commanders of the major subordinate commands, their Directors of IL, and to USAILCOM for referral to the appropriate level if the dollar value of the case exceeds that amount authorized for signature at the MSCs or USAILCOM.
- (3) <u>Interfaces</u>. Thirteen (13) interfaces were identified as necessary to fulfill this function or requirement, and all are considered valid,

performing and critical.

- h. Forward Letter of Offer and Acceptance to Washington Field Office (Block 8.0)
- (1) <u>Description</u>. This function involves forwarding the letter of offer and acceptance to the WFO for review, coordination, and approval.
- (2) <u>Responsibility</u>. The Directors of IL at the MSCs have the responsibility within this function.
- (3) <u>Interfaces</u>. Nine (9) interfaces were identified for this function. All interfaces were considered valid, critical, and performing.
 - i. Review and Coordinate Letter of Offer and Acceptance (Block 9.0)
- (1) <u>Description</u>. This function concerns the review and coordination of letters of offer and acceptance at the DARCOM and DA levels prior to approval of the case.
- (2) <u>Responsibility</u>. The primary responsibility for this function is delegated to the WFO (Regional Management), USAILCOM.
- (3) <u>Interfaces</u>, Fifteen (15) interfaces were identified as necessary to fulfill this functional responsibility. All interfaces were determined to be valid and performing. One interface, Regional Operations, USAILCOM, NCAD, is considered critical.
 - j. Approve Letter of Offer and Acceptance (Block 10.0).
- (1) <u>Description</u>. This function concerns the approval of the letters of offer and acceptance only. The approval authority is delegated in accordance with the dollar value of the case.
- (2) <u>Responsibility</u>. The WFO (Regional Management) is responsible to forward the letters of offer and acceptance to the appropriate level for approval.

- (3) <u>Interfaces</u>. Sixteen (16) interfaces were identified as necessary within this function. All interfaces were considered valid, critical, and performing.
 - k. Dispatch Letter of Offer and Acceptance to Customer (Block 11.0)
- (1) <u>Description</u>. Only the administrative function of forwarding an approved FMS letter of offer and acceptance is involved in this function.
- (2) <u>Responsibility</u>. The WFO (Director of Regional Management) is solely responsible for this function.
 - (3) Interfaces. None
- 1. Customer Acceptance of the Letter of Offer as Written or Changed
 (Block 12.0)
- (1) <u>Description</u>. This function involves the acceptance of the letter of offer and acceptance.
- (2) <u>Responsibility</u>. The WFO (Director of Regional Management) is responsible for this function.
 - (3) Interfaces. None
- m. <u>Customer Non-acceptance Close Case File and Update DOD Control</u>
 <u>Ledger (Block 13.0)</u>
- (1) <u>Description</u>. This function only concerns the administrative actions involved in the non-acceptance of a letter of offer and acceptance by an FMS customer.
- (2) <u>Responsibility</u>. The WFO (Director of Regional Management) has sole responsibility for this function.
 - (3) Interfaces. None

ANNEX D

FUNCTIONAL CATEGORY IV

TITLE: Financial Management

- 1. <u>Purpose</u>: To provide effective financial management within the DARCOM portion of the International Logistics program, the functions/subfunctions presented in this annex are considered necessary. The Army Logistics System functions into which they are integrated or require interface are presented in Appendix 1. Interfaces considered necessary in the performance of each function/subfunction are contained in Appendix 2.
- 2. General: The functions comprising this functional category are:
 - a. <u>Trust Fund Accounting</u> (Block 1.0)
 - b. Programming (Block 2.0)
 - (1) MAP (Block 2.1)
 - (2) 0&MA (Block 2.2)
 - (3) PAA (Block 2.3)
 - c. Budgeting (Block 3.0)
 - (1) MAP (Boock 3.1)
 - (2) 0&MA (Block 3.2)
 - (3) PAA (Block 3.3)
 - d. Fund Allocation/Allotment (Block 4.0)
 - e. Stock Fund (Block 5.0)
 - (1) Army (Block 5.1)
 - (2) DSA/GSA (Block 5.2)
 - f. Billing (Block 6.0)
 - g. <u>Disburse/Reimburse</u> (Block 7.0)

- h. Audits (Block 8.0)
- i. Final Case Accounting (Block 9.0)
- j. Review and Analysis (Block 10.0)

3. Discussion:

- a. Trust Fund Accounting (Block 1.0)
- (1) <u>Description</u>. Upon acceptance of a Letter of Offer and Acceptance by a foreign government, the customer makes advanced deposits of monies in the FMS Trust Fund to defray the cost of items requested. The fund is maintained by the Finance and Accounting Office, NCAD.
- (2) <u>Responsibility</u>. The Comptroller and the Director for Regional Operations, USAILCOM, NCAD, are responsible for the administration of the FMS Trust Fund.
- (3) <u>Interfaces</u>. Four (4) interfaces were identified to fulfill this functional requirement. All of the interfaces were determined valid, performing, and critical.
 - b. Programming (Block 2.0)
 - c. MAP (Block 2.1)
- (1) <u>Description</u>. The programming for MAP within DARCOM is based on the approved program provided by DSAA. The approved MAP programs furnished by DSAA are used by DARCOM elements to fulfill MAP orders received for execution.
- (2) <u>Responsibility</u>: The overall MAP programming is delegated to DSAA, which includes input from MAAGs and missions. At DARCOM HQ, the Associate Director for Requirements and Resources and the Comptroller integrate MAP requirements into the overall DARCOM program. The USAILCOM (Director for Program Management, WFO, and the Comptroller, NCAD) develops the DARCOM MAP program. Appropriate staff elements within the MSC's (Directors of IL and

Comptrollers) are responsible for program development within their commands in coordination with other functional directorates.

- (3) <u>Interfaces</u>. Fifty-three (53) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Thirty-eight (38) interfaces were considered valid and performing.
 - b. Duplicate Interfaces. None
- c. <u>Voids</u>. Fifteen (15) interface voids were identified in the analysis. The voids are listed below:

1 ARMCOM

Director of International Logistics

Director of RD&E

Director of Procurement and Production

2 AVSCOM

Director of Maintenance

Director of RD&E

3 ECOM

Director of RD&E

Director of Procurement and Production

Project Managers

4 MICOM

Project Managers

5 TARCOM

Director of Materiel Management

Director of Maintenance

6 TROSCOM

Director of Materiel Management

Director of Maintenance

Director of RD&E

Director of Procurement and Production

(d) Critical Interfaces

- 1 DOD
- 2 DSAA
- 3 Unified Commands
- 4 MAAGs and Missions
- 5 DSA
- 6 DA
- Comptroller, HQ DARCOM
- 8 Director for Program Management, WFO, USAILCOM
- 9 Director for Program Operations, NCAD, USAILCOM
- 10 Comptroller, NCAD, USAILCOM
- 11 All elements of the MSC's listed as critical in the matrix
- 12 GSA
- d. 0&MA (Block 2.2)
- (1) <u>Description</u>. Programming of MAP and FMS support under O&MA funding involves all aspects of the DARCOM functional areas supporting the ILP, and which require reimbursement of O&MA funds expended.
- (2) <u>Responsibility</u>. The O&MA programming within HQ DARCOM is the responsibility of the Associate Director for Requirements and Resources, and the Comptroller. The IL portion input is the responsibility of the Director for Program Management, WFO, and the Comptroller, NCAD, of USAILCOM. Responsibility for IL programming within the MSC's is delegated to the Directors of

IL and the Comptrollers, in coordination with other functional directorates.

- (3) <u>Interfaces</u>. Sixty (60) interfaces were identified as necessary to fulfill this function.
- (a) <u>Valid Interfaces</u>. Forty-nine (49) interfaces were determined as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Eleven (11) interface voids were identified. The voids are listed below:
 - 1 Associate Director for Maintenance, HQ DARCOM
 - 2 Major Subordinate Commands

ARMCOM

Director of International Logistics

Director of Procurement and Production

AVSCOM

Director of Product Assurance

ECOM

Director of RD&E

Director of Procurement and Production

Director of Product Assurance

Project Managers

TARCOM

Director of Materiel Management

Director of Product Assurance

TROSCOM

Director of RD&E

(d) Critical Interfaces

- 1 DOD
- 2 DSAA
- 3 DSA
- 4 DA
- 5 Comptroller, HQ DARCOM
- 6 Director for Program Management, WFO, USAILCOM
- 7 Director for Program Operations, NCAD, USAILCOM
- 8 Comptroller, NCAD, USAILCOM
- 9 All elements of the MSC's listed in the matrix
- 10 MIDA
- 11 GSA
- e. PAA (Block 2.3)
- (1) <u>Description</u>. The PAA programming function provides items in the ILP that are required from procurement using PAA funding.
- (2) Responsibility. Within HQ DARCOM, PAA programming responsibility is delegated to the Associate Director of Requirements and Resources and the Comptroller. At the USAILCOM, this responsibility is delegated to the Director of Program Management, WFO, and the Comptroller, NCAD. The Directors of IL and the Comptrollers in the MSC's are delegated this responsibility in coordination with appropriate functional directorates.
- (3) <u>Interfaces</u>. Fifty-seven (57) interfaces were identified as necessary within this subfunction.
- (a) <u>Valid Interfaces</u>. Forty-five (45) of the interfaces identified were considered valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None

- (c) <u>Voids</u>. Twelve (12) interface voids were identified by the analysis. The voids are listed below:
 - 1 Associate Director for Maintenance, HQ DARCOM
 - 2 Major Subordinate Commands

ARMCOM

Director of International Logistics

Director of Procurement and Production

AVSCOM

Director of Maintenance

ECOM

Director of Maintenance

Director of RD&E

Director of Procurement and Production

Project Managers

TARCOM

Director of Materiel Management

TROSCOM

Director of Maintenance

Director of RD&E

- 3 MIDA
- (d) Critical Interfaces.
- 1 DOD
- 2 DSAA
- 3 DSA
- 4 DA
- 5 Director for Materiel Management, HQ DARCOM

- 6 Comptroller, HQ DAROOM
- 7 Associate Director for Maintenance, HQ DARCOM
- 8 Director for Program Management, WFO, USAILCOM
- 9 Director for Program Operations, NCAD, USAILCOM
- 10 Comptroller, NCAD, USAILCOM
- 11 All elements of the MSC's listed in the matrix
- 12 MIDA
- 13 **GSA**
- f. Budgeting (Block 3.0)
- g. MAP (Block 3.1)
- (1) <u>Description</u>. MAP budgeting is provided the DARCOM by DSAA.
- (2) <u>Responsibility</u>. Overall MAP budgeting is the responsibility of DSAA based upon Congressional approved funding. The Comptroller, HQ DARCOM, is responsible to develop and maintain the MAP-GA budget. It is the responsibility of the Comptrollers throughout DARCOM, supported by the Directors of IL and other functional areas, to furnish budget data.
- (3) <u>Interfaces</u>. Fifty-one (51) interfaces were identified as necessary to fulfill this subfunction.
- (a) <u>Valid Interfaces</u>. The analysis revealed thirty-five (35) of the interfaces to be valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Sixteen (16) interface voids were identified. The voids are listed below:

Major Subordinate Commands

ARMCOM

Director of RD&E

Director of Procurement and Production

AVSCOM

Director of Maintenance

Director of RD&E

ECOM

Director of Maintenance

Director of RD&E

Director of Procurement and Production

Project Managers

MICOM

Director of Maintenance

Project Managers

TARCOM

Director of Maintenance

Director of Procurement and Production

TROSCOM

Director of Materiel Management

Director of Maintenance

Director of RD&E

Director of Procurement and Production

- (d) <u>Critical Interfaces</u>. All interfaces identified are considered critical to this function.
 - h. <u>0&MA</u> (Block 3.2)
- (1) <u>Description</u>. The budgeting of O&MA funds for the ILP enables all DARCOM elements to assure that the funding is available to meet all IL programmed requirements. It also enables DARCOM to recover all O&MA monies

expended in all O&MA budget accounts in support of the ILP.

- (2) <u>Responsibility</u>. The Comptrollers and the Directors of IL at all DARCOM levels are responsible for O&MA budgeting. All other functional areas at all levels within DARCOM are responsible to submit budget detail support of their respective areas.
- (3) <u>Interfaces</u>. Sixty (60) interfaces were identified as necessary within this subfunction.
- (a) <u>Valid Interfaces</u>. Forty-seven (47) were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Thirteen (13) interface voids were identified in the analysis. The voids are listed below:
 - 1 Associate Director for Maintenance, HQ DARCOM
 - 2 Major Subordinate Commands

ARMCOM

Director of Procurement and Production

AVSCOM

Director of RD&E

Director of Product Assurance

ECOM

Director of RD&E

Director of Procurement and Production

Director of Product Assurance

Project Managers

Special Items Management Office

TARCOM

Director of Product Assurance

TROSCOM

Director of RD&E

Director of Product Assurance

Special Items Management Office

- (d) <u>Critical Interfaces</u>. All interfaces identified for the function are considered critical.
 - i. PAA (Block 3.3)
- (1) <u>Description</u>. This function concerns the budgeting to meet ILP requirements that are filled from procurement.
- (2) <u>Responsibility</u>. The Comptrollers at all levels are responsible for PAA budgeting. They are assisted by input from the Directors of IL and other functional areas throughout DARCOM.
- (3) <u>Interfaces</u>. Forty-seven (47) interfaces were identified as necessary to fulfill this subfunction.
- (a) <u>Valid Interfaces</u>. Thirty-nine (39) interfaces identified in the analysis were considered valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Eight (8) interface voids were identified. The voids are listed below:
 - $\underline{1}$ Associate Director for Maintenance, HQ DARCOM
 - 2 Major Subordinate Commands

ARMCOM

Director of Procurement and Production

ECOM

Director of Project/Product Management

Project Managers

Special Items Management Office

TARCOM

Director of International Logistics

Director of Materiel Management

Director of RD&E

Project Management

TROSCOM

Director of International Logistics

Director of RD&E

Special Items Management Office

- 3 General Services Administration
- (d) <u>Critical Interfaces</u>. All forty-seven (47) of the interfaces identified are considered critical.
 - j. Fund Allocation/Allotment(Block 4.0)
- (1) <u>Description</u>. This function is concerned with the allocation of funding to accomplish the ILP throughout DARCOM.
- (2) <u>Responsibility</u>. Responsibility for fund allocation/allotment rests with the Comptroller at each level of the allocation/allotment process.
- (3) <u>Interfaces</u>. Forty-five (45) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. Thirty-three(33) of these interfaces were considered valid and performing.
 - (b) Duplicate Interfaces. None

(c) <u>Voids</u>. Twelve (12) interface voids were identified in the analysis. The voids are listed below:

Major Subordinate Commands

ARMCOM

Director of RD&E

ECOM

Director of RD&E

Director of Project/Product Management

Special Items Management Office

TARCOM

Director of International Logistics

Director of Materiel Management

Director of RD&E

Director of Project/Product Management

TROSCOM

Director of International Logistics

Director of RD&E

Special Items Management Office

- (d) <u>Critical Interfaces</u>. All forty-five (45) of the identified interfaces are considered critical.
 - k. Stock Fund (Block 5.0)
 - 1. <u>Army (Block 5.1)</u>
- (1) <u>Description</u>. The Army Stock Fund resources are used to support the IL system with parts/repair parts as required.
- (2) <u>Responsibility</u>. The responsibility for the IL portion of the ASF rests with the Comptrollers at DSAA and DARCOM, and input to the ASF is the responsibility of the Directors of IL, Materiel Management, Comptroller, and

Procurement and Production at the MSC's.

- (3) <u>Interfaces</u>. Forty-six (46) interfaces were identified as necessary within this subfunction.
- (a) <u>Valid Interfaces</u>. A total of twenty-four (24) interfaces were identified as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None.
- (c) <u>Voids</u>. Twenty-two (22) interface voids were identified in the analysis. The voids are shown below:
 - 1 DSAA
 - 2 DA
 - 3 Director for International Logistics, HQ DARCOM
 - 4 Director for Program Management, WFO, USAILCOM
 - 5 Major Subordinate Commands

ARMCOM

Director of International Logistics

Director of Procurement and Production

Director of International Logistics

Director of Maintenance

Special Items Management Office

6 MIDA

(d) <u>Critical Interfaces</u>. All interfaces identified within this function are considered critical.

m. DSA and GSA (Block 5.2)

- (1) <u>Description</u>. The Defense Supply Agency and the General Services

 Administration operate the stock fund within their activities. This function is concerned with the reimbursement of those organizations for items furnished for Army FMS cases.
- (2) <u>Responsibility</u>. The primary responsibility for this function is delegated to the Director for Regional Operations, NCAD, USAILCOM. The Directors of International Logistics, Materiel Management, and Comptrollers at the MSC's also have responsibility for input from their respective organizations.
- (3) <u>Interfaces</u>. Three (3) interfaces were identified to fulfill this responsibility.
- (a) <u>Valid Interfaces</u>. Only one (1) interface was determined to be valid and performing within this subfunction.

- (b) <u>Duplicate Interfaces</u>. None.
- (c) Voids. Two (2) interface voids were identified in the analysis.
- 1 DSA
- 2 GSA
- (d) <u>Critical Interfaces</u>. All of the interfaces identified are considered critical.
 - n. Billing (Block 6.0)
- (1) <u>Description</u>. The billing function is concerned with the prompt billing of foreign customers to facilitate case close-out and reimbursement of Army accounts.
- (2) <u>Responsibility</u>. The Comptroller, USAILCOM, NCAD, has primary responsibility for billing foreign countries upon receipt of billing documents from the MSC's.
- (3) <u>Interfaces</u>. Twenty-eight (28) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Twenty-seven (27) of the interfaces were considered valid and performing.
- (b) <u>Duplicate Interfaces</u>. Three (3) interfaces are considered to be duplications.

ARMCOM

Director of Materiel Management

ECOM

Director of Materiel Management

MICOM

Director of Materiel Management

(c) <u>Voids.</u> One (1) interface void was identified and is indicated below:

COMSEC LOG AGY

- (d) <u>Critical Interfaces</u>. All interfaces identified, except the Legal Counsel, ARMCOM, are considered critical to this function.
 - o. Disburse-Reimburse (Block 7.0)
- (1) <u>Description</u>. This function concerns the disbursing and reimbursement of funds in the ILP. It is the means of quickly paying and recovering funds for the material/services provided to the IL customers.
- (2) <u>Responsibility</u>. The Comptroller, NCAD, USAILCOM, is responsible for assuring that all International Logistics Program obligations are paid and that all monies due the U.S. Government are collected in a timely manner. He is supported by the appropriate elements of the MSC's in accomplishing this function, i.e., Directors of IL and Materiel Management and the Comptrollers.
- (3) <u>Interfaces</u>. Twenty-five (25) interfaces were identified for this function.
- (a) <u>Valid Interfaces</u>. Twenty-three (23) of the interfaces were considered valid and performing.
- (b) <u>Duplicate Interfaces</u>. Three (3) duplicate interfaces were identified and are shown below:

ARMCOM

Director of Maintenance

ECOM

Director of Materiel Management

MICOM

Director of Maintenance

- (c) Voids. Two (2) voids were identified:
- 1 Director of International Logistics, TROSCOM
- 2 GSA
- (d) <u>Critical Interfaces</u>. Twenty-one (21) critical interfaces were determined for this function.
- 1 DSAA
- 2 DSA
- 3 DA
- 4 Other Military Services
- 5 Comptroller, HQ DARCOM
- 6 Director for Program Management, WFO, USAILCOM
- 7 Director for Program Operations, NCAD, USAILCOM
- 8 Comptroller, NCAD, USAILCOM
- 9 Director of International Logistics, all M&C's
- 10 Comptroller, all MSC's
- 11 GSA
- p. Audits (Block 8.0)
- (1) <u>Description</u>. This function is the means of assuring that all financial aspects of the ILP are properly performed.
- (2) <u>Responsibility</u>. The Government Accounting Office, the Army Audit Agency, and the Comptrollers throughout the DARCOM complex are each responsible for making audits of IL cases.
- (3) <u>Interfaces</u>. A total of fifty-seven (57) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Twenty-seven (27) of the interfaces were determined to be valid and performing.

- (b) Duplicate Interfaces. None
- (c) Voids. Thirty (30) voids were identified and are listed below:
- 1 DSA
- 2 Major Subordinate Commands

ARMCOM

Director of Materiel Mamagement

Director of Procurement and Production

- q. Final Case Accounting (Block 9.0)
- (1) <u>Description</u>. This function is to assure that all financial records are closed out upon completion of a case.
- (2) <u>Responsibility</u>. The Comptroller, USAILCOM, NCAD, has the primary responsibility for final case accounting. He is assisted in this function by the Comptrollers and other appropriate functional directors of the MSC's.
- (3) <u>Interfaces</u>. A total of sixty-seven (67) were identified in this function.
- (a) <u>Valid Interfaces</u>. Twenty (20) of the interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Forty-seven (47) voids existed in the function. The voids are listed below.
 - 1 Unified Commands
 - 2 MAAGS and Missions
 - 3 DSA
 - 4 Director for International Logistics, HQ DARCOM
 - 5 Comptroller, HQ DARCOM
 - 6 Major Subordinate Commands

- 7 NCAD F&A Office
- 8 GSA
- (d) <u>Critical Interfaces</u>. All sixty-seven (67) interfaces are considered to be of critical importance due to the nature of the function.
 - r. Review and Analysis (Block 10.0)
- (1) <u>Description</u>. This function is concerned with the review of IL records and performance to insure that all proper and necessary steps were taken in the processing of the case. These records also form the basis for analysis of the events to determine how well the required steps were performed and to aid in the development of improvements in the procedures.

- (2) <u>Responsibility</u>. The Director for Program Operations, NCAD, USAILCOM is responsible for the review and analysis of IL cases.
- (3) <u>Interfaces</u>. A total of sixty-two (62) interfaces were identified to provide complete review and analysis.
- (a) <u>Valid Interfaces</u>. Forty-three (43) of these interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Nineteen (19) voids were identified in the analysis and are listed below.

ANNEX E

FUNCTIONAL CATEGORY V

TITLE: Case Management

- 1. <u>Purpose</u>. This annex lists the functions/subfunctions considered necessary to properly manage a foreign military sales case. Appendix 1 indicates the Army Logistics System functions into which they are integrated or require interface. The interfaces considered necessary in the performance of each function/subfunction are indicated in Appendix 2.
- 2. General. The functions identified and evaluated in this annex are:
 - a. Maintain case file (Block 1.0).
 - b. Maintain DOD Offer/Acceptance Control Ledger (Block 2.0).
 - c. Liaison/Coordination (Block 3.0).
 - d. Initiate supply action (Block 4.0).
 - (1) Provide copy of approved FMS case/MAP order (Block 4.1).
 - (2) Provide FMS funding advice/Allocate MAP funds (Block 4.2).
 - e. Monitor case status (Block 5.0).
 - f. Process ROIDS (Block 6.0).
 - g. Case audit (Block 7.0).
 - h. Case closeout (Block 8.0).

3. Discussion.

- a. Maintain case file (Block 1.0).
- (1) <u>Description</u>. This function concerns the establishment of a case file for all approved FMS cases/MAP orders being processed within the DARCOM IL program. Each organizational element of HQ DARCOM, USAILCOM, the MSC's, and other organizations/elements of DARCOM having responsibilities concerned

with a FMS case/MAP order should maintain a file to provide an audit trail for each case being processed.

- (2) Responsibility. The staff chiefs of HQ DARCOM, USAILCOM, and the commanders of each MSC and other commands within DARCOM and the chiefs of other elements having functional responsibilities for FMS cases are responsible to insure that a case file is established within each organizational entity of his command/organization concerned with IL.
- (3) <u>Interfaces</u>. Seventy-one (71) interfaces were identified as required within this functional area.
- (a) <u>Valid Interfaces</u>. Twenty-eight (28) of the interfaces identified within this function were identified as valid and being performed.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. The analysis of this function revealed forty-three (43) interface voids. The voids identified in the analysis are listed below:
 - 1 USA Medical Materiel Agency
 - 2 Defense Supply Agency
 - <u>3</u> Major subordinate commands

- 4 General Service Administration
- 5 Major Item Data Agency
- (d) <u>Critical interfaces</u>. Management of all FMS cases is considered essential, and it must be achieved through a complete and clearcut audit trail within all MSC's, elements, and organizations of DARCOM having IL responsibilities. Therefore, all interfaces identified within this function are considered critical.
 - b. Maintain DOD Offer/Acceptance Control Ledger (Block 2.0)
- (1) <u>Description</u>. This function concerns the maintenance of the DOD Offer/Acceptance Control Ledger in the WFO, USAILCOM, by the Director for Regional Management.
- (2) <u>Responsibility</u>. The responsibility for this function is delegated to the Director for Regional Management, WFO, USAILCOM.
- (3) <u>Interfaces</u>. No interfaces with the Director of Regional Management, WFO, USAILCOM, were identified, and none were considered necessary in the analysis.

- c. Liaison/Coordination (Block 3.0)
- (1) <u>Description</u>. The magnitude of liaison/coordination needed to properly manage FMS cases is reflected in this function. It is necessary to perform this function in accomplishing all other functions included in the case management aspect of the DARCOM IL program.
- (2) Responsibility. The performance of this function rests primarily with the Director for Program Operations, NCAD, USAILCOM. However, all other commands (MSC's and others)/elements/organizations are responsible to insure that both internal and external coordination is accomplished for FMS cases within their areas of responsibility.
- (3) <u>Interfaces</u>. The analysis identified ninety-two (92) interfaces necessary to fulfill this functional responsibility.
- (a) <u>Valid interfaces</u>. Seventy (70) interfaces were identified as valid and being performed.
 - (b) Duplicate interfaces. None
- (c) <u>Voids</u>. Twenty-two (22) interface voids were identified. Listed below are the voids:
 - 1 USA Medical Materiel Agency
 - 2 DARCOM HQ

Director for International Logistics

Director for Materiel Management

- 4 Development Centers
- 5 Private Industry
- 6 Freight Forwarders
- 7 Major Item Data Agency
- (d) <u>Critical interfaces</u>. Because of the criticality of liaison/coordination to the case management aspect of the IL program, all interfaces are considered critical.
 - d. Initiate supply action (Block 4.0)
- (1) <u>Description</u>. This function concerns the initial action taken within the DARCOM IL procedure to furnish the items requested in a MAP order or a

FMS case. It concerns the receipt of the case (MAP or FMS) at the USAILCOM HQ (Director of Regional Operations). That Headquarters takes action relative to DSA and GSA furnished items, and they process and refer requests for Army furnished items to the appropriate DARCOM MSC.

- (2) Responsibility. USAILCOM (Director for Program Operations, NCAD) has the responsibility to receive, process, and control all inputs to the DARCOM ILP. He also takes NICP type actions on DSA and GSA items for a MAP or FMS case. He also has the responsibility to refer requests for Army furnished items to the appropriate MSC for supply action. Within the MSC's it is the responsibility of the Director of IL and Materiel Management to initiate supply actions on Army furnished items.
- (3) <u>Interfaces</u>. Eighteen (18) interfaces were identified to perform this function.
- (a) <u>Valid Interfaces</u>. The analysis identified fourteen (14) interfaces as valid and performing within this function.
 - (b) Duplicate interfaces. None
- (c) <u>Voids</u>. Four (4) interface voids were identified for this function. Listed below are the voids identified.
 - 1 DSA
 - 2 Improved Hawk, Iran (MICOM)
 - 3 Weapons System Management Office (AVSCOM)
 - 4 General Services Administration
- (d) <u>Critical Interfaces</u>. In consideration of the importance of the complete fulfillment of this function, all interfaces identified are considered critical.
 - e. Provide copy of approved FMS case/MAP order (Block 4.1)

- (1) <u>Description</u>. The approved FMS case/MAP order is the means by which supply action is initiated on FMS and MAP cases. It commences with the receipt of the FMS or MAP case at USAILCOM (WFO/NCAD) and extends through dispatch of the case to the responsible supply agency to obtain and ship the items requested by the IL customer.
- (2) Responsibility. Upon receipt of an approved FMS case/MAP order at USAILCOM, it is the responsibility of the Director for Program Operations, NCAD, to dispatch the authorization to the appropriate supply agency both within and outside DARCOM (MSC's-DSA-GSA). Upon receipt of the approved orders/case within the MSC's, it is the responsibility of the Comptrollers and Directors of IL to provide the authorization to the appropriate MSC internal elements.
- (3) <u>Interfaces</u>. Sixteen (16) Interfaces were identified as required to perform this subfunction.
- (a) <u>Valid Interfaces</u>. Within the subfunction, thirteen (13) interfaces were determined to be valid and being performed.
- (b) <u>Duplicate Interfaces</u>. Three (3) interfaces were determined to be duplicative. Listed below are the duplicative interfaces:
 - 1 Major Subordinate Commands.

ECOM

Director of Materiel Management

MICOM

Director of Materiel Management

TARCOM

Director of Materiel Management

(c) <u>Voids</u>. Three (3) interface voids were identified within this subfunction. Listed below are the voids:

- 1 Director of IL TROSCOM
- 2 Comptroller AVSCOM
- 3 Comptroller ECOM
- (d) <u>Critical Interfaces</u>. The importance of this function dictates all interfaces as critical.
 - f. Provide FMS funding advice/Allocate MAP funds (Block 4.2)
- (1) <u>Description</u>. This subfunction concerns the allocation of FMS and MAP funding authority to the appropriate supply source to furnish the items requested.
- (2) Responsibility. The primary responsibility for furnishing funding advice in this function is delegated to the Comptrollers of all DARCOM elements/organizations/agencies having IL functional responsibilities.

 Once it is received by the functional elements, it is used by them to acquire the items requested from whatever source it can most economically and within reasonable time frames be obtained.
- (3) <u>Interfaces</u>. The analysis identified fifty-seven (57) interfaces required to accomplish this subfunction.
- (a) <u>Valid Interfaces</u>. Twenty (20) interfaces were considered valid and were being performed.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Thirty-seven (37) interface voids were identified in this subfunction. Listed below are the voids identified:
 - $\underline{1}$ Department of the Army
 - 2 Comptroller, HQ DARCOM
 - 3 Major Subordinate Commands

- g. Monitor Case Status (Block 5.0)
- (1) <u>Description</u>. This function involves the monitoring of each FMS or MAP case being processed in the DARCOM IL program. It enables all commands/agencies/elements/organizations within the DARCOM to insure that the cases are being accomplished within established time frames, and that all functional requirements are being fulfilled in order that FMS/MAP customer requirements are satisfied in a timely, efficient, and economical manner.
- (2) <u>Responsibility</u>. It is the responsibility of the Director for Program Operations, NCAD, USAILCOM, to insure that all responsible DARCOM commands/ elements/agencies/organizations are fulfilling their IL responsibilities relative to each FMS/MAP case. It is, in turn, the responsibility of each Commander/Chief to insure that each element within his command/activity is fulfilling its responsibility in a timely, efficient, and economical manner.
- (3) <u>Interfaces</u>. Seventy-four (74) interfaces were determined necessary to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. This function included forty-one (41) interfaces that were considered valid and performing.
 - (b) Duplicate Interfaces. None.
- (c) <u>Voids</u>. The analysis identified thirty-three (33) interface voids within this function. Listed below are the voids identified:

- 1 Defense Supply Agency
- 2 HQ DARCOM

Comptroller

Director for Procurement and Production

Director for Quality Assurance

Director for International Logistics

3 USAILCOM

- 5 General Services Administration
- 6 Major Item Data Agency
- (d) <u>Critical Interfaces</u>. Due to the nature and importance of this function, all interfaces identified in the analysis are considered critical to the management of FMS/MAP cases.
 - h. Process ROIDS (Block 6.0).
- (1) <u>Description</u>. This function is concerned with the processing of Reports of Item Discrepancies (ROIDs). These reports are submitted by the recipient governments when items are received damaged, short, not meeting specifications, etc. The processing of ROIDs within the DARCOM ILP is necessary to verify the conditions cited by the recipient government, to

determine causes for the unsatisfactory conditions, and to effect corrective action.

- (2) <u>Responsibility</u>. Primary responsibility to supervise the processing of ROIDs within the DARCOM ILP is delegated to the Director for Program Operations, NCAD, USAILCOM. The actual processing is the responsibility of the appropriate supply agency and other channels handling the shipment.
- (3) <u>Interfaces</u>. A total of seventy-six (76) interfaces were identified as necessary to properly fulfill this function.
- (a) <u>Valid Interfaces</u>. The analysis identified twenty-three (23) interfaces as valid and being performed.
 - (b) Duplicate Interfaces. None.
- (c) <u>Voids</u>. Fifty-three (53) interface voids were identified in the analysis. The voids identified are listed below:
 - 1 Country
 - 2 DSAA
 - 3 Unified Commands
 - 4 MAAGS and Missions
 - 5 Other Military Services
 - 6 Director for Transportation and Traffic Management, NCAD, USAILCOM
 - 7 Major Subordinate Commands

- (d) <u>Critical Interfaces</u>. Because of the necessity to fix responsibility and verify all item discrepancies and take remedial action to prevent recurrences, all interfaces identified are considered critical.
 - i. Case Audit (Block 7.0).
- (1) <u>Description</u>. This function is not related to financial audits as outlined in Category IV (Financial Management), but is concerned with IL program performance from a management point of view. It is the means by

which management at all levels of the DARCOM IL program insure that FMS/MAP case processing is progressing efficiently and on schedule.

- (2) Responsibility. The responsibility for this function is delegated to the Commanders/Chiefs of all DARCOM organizations/elements/agencies having IL responsibilities. The aforementioned Commanders/Chiefs interface with other activities concerned with the case such as the recipient countries, DOD elements and commands, Department of the Army staff elements, and the GSA, etc.
- (3) <u>Interfaces</u>. Seventy-two (72) interfaces were identified as required to perform this function.
- (a) <u>Valid Interfaces</u>. The analysis revealed twenty-six (26) interfaces as valid and being performed.
 - (b) Duplicate Interfaces. None.
- (c) <u>Voids</u>. Forty-six (46) interface voids were identified within this function. Listed below are the voids:
 - Defense Supply Agency
 - 2 Department of the Army
 - <u>3</u> Other military services
 - 4 Major subordinate commands

- j. Case Closeout (Block 8.0)
- (1) <u>Description</u>. This function is concerned with closing the records of all DARCOM commands/organizations/agencies/elements that maintain a file of FMS cases. It is actually the final audit of the case to assure that all items have been delivered and that material and financial records are closed.
- (2) <u>Responsibility</u>. Primary responsibility for this function is delegated to the Director of Regional Management, WFO, USAILCOM. The commanders/chiefs of DARCOM MSC's/commands/elements/agencies/organizations are responsible to close out local records and support the WFO, USAILCOM, in formal case closeout actions.
- (3) <u>Interfaces</u>. Sixty-seven (67) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Sixteen (16) interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Fifty-one (51) interface voids were identified in the evaluation of this function. Listed below are the interface voids identified:

ANNEX F

FUNCTIONAL CATEGORY VI

TITLE: Materiel/Services Management

- 1. <u>Purpose</u>. This annex contains the functions/sub-functions identified as necessary in the management of materiel/services included in a Foreign Military Sales case/MAP order. The Army Logistics System functions into which they are integrated or require interface are reflected in Appendix 1. Appendix 2 indicates the interfaces considered necessary in the performance of each function/sub-function.
- 2. <u>General</u>: For the purposes of the study, the functions/sub-functions determined necessary in this functional category are:
 - a. Requirements Execution (Block 1.0)
 - (1) Stock on hand (Block 1.1)
 - (2) MAP owned materiel (Block 1.2)
 - (3) Excess to RO (Block 1.3)
 - (4) Use of MIMEX (Block 1.4)
 - (5) Disposal (Block 1.5)
 - (6) Due-in (Block 1.6)
 - (7) Interchangeability/Substitutability (Block 1.7).
 - (8) Overhaul/Rebuild (Block 1.8)
 - (9) Procurement (Block 1.9)
 - b. Concurrent Spare Parts (Block 2.0)
 - c. Publications (Block 3.0)
 - d. Loan of Equipment (Block 4.0)
 - e. Purpose Code Assignment/Coordination (Block 5.0)

- f: Supportability Plan/Statement (Block 6.0)
- g. International Logistics Supply Delivery Plan (Block 7.0)
- h. Requisition Processing (Block 8.0)
- i. Quality/Product Control (Block 9.0)
- j. Issue (Block 10)
- (1) Transfer of Title (Block 10.1)
- (2) Export License (munitions only) (Block 10.2)
- k. Packing/Crating/Handling Policy (Block 11.0)
- 1. Shipping (Block 12.0)
- (1) Freight Forwarders (Block 12.1)
- (2) Defense Transportation System (Block 12.2)
- m. Technical Data Package (Block 13.0)
- n. Requisition/History File (Block 14.0)
- o. Delivery/Billing (Block 15.0)

3. Discussion:

- a. Requirements Execution (Block 1.0)
- (1) <u>Description</u>. This overall function involves the determination of the sources from which the items/services requested in a FMS/MAP order case will be furnished. The sub-functions discussed within this function portray the various sources considered by the MSC's in fulfilling the IL requirements.
- (2) <u>Responsibility</u>. The primary responsibility for this function is delegated to the Directors of Materiel Management at the MSC's. However, the Directors of IL at the MSC's have coordinating responsibility. Overall staff supervision of this function, from the ILP point of view, is delegated to appropriate staff elements at the WFO and NCAD, USAILCOM.

- (3) <u>Interfaces</u>. The analysis identified sixty (60) interfaces as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Thirty-six (36) interfaces were determined to be valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. It was determined that twenty-four (24) interface voids exist within this function. The voids are identified below:
 - 1 Major Subordinate Commands

ARMCOM

Director of Maintenance

Director of RD&E

Director of Procurement and Production

AVSCOM

Director of International Logistics

Director of RD&E

Iran Project Office

Weapons System Management Office

ECOM

Director of Maintenance

Project Managers

Special Items Management Office

MICOM

Director of International Logistics

Director of Maintenance

Director of RD&E

Director of Procurement and Production

MICOM Field Office, IRAN

TARCOM

Director of Maintenance

Director of RD&E

Director of Procurement and Production

TROSCOM

Director of International Logistics

Director of Maintenance

Director of RD&E

Director of Procurement and Production

Special Items Management Office

2 MIDA

- (d) Critical Interfaces.
- 1 DOD
- 2 DSAA
- 3 Country
- 4 Unified Commands
- 5 MAAGS and Missions
- 6 DSA
- 7 DA
- 8 U.S. Army Medical Materiel Agency
- 9 Other Military Services
- 10 Director for Materiel Management, HQ DARCOM
- 11 Director for Program Management, WFO, USAILCOM
- 12 Director for Regional Operations, NCAD, USAILCOM
- 13 All elements of the MSC's listed in the matrix

- 14 MIDA
- 15 GSA
- b. Stock on Hand (Block 1.1)
- (1) <u>Description</u>. This function concerns the determination of whether adequate stocks are on hand to fulfill IL case requirements without degrading the support of U.S. forces.
- (2) <u>Responsibility</u>. The responsibility for this sub-function is delegated to the Directors of Materiel Management at the MSC's.
- (3) <u>Interfaces</u>. Seventeen (17) interfaces were identified in the analysis as necessary to perform this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis identified twelve (12) of the interfaces as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Within this sub-function, five (5) interface voids were identified. The voids are listed below:
 - $\underline{1}$ AVSCOM Director of International Logistics
 - <u>2</u> ECOM Special Items Management Office
 - 3 MICOM Director of International Logistics
 - 4 TROSCOM Director of International Logistics,
 Special Items Management Office
- (d) <u>Critical Interfaces</u>. All interfaces identified within this sub-function are considered critical.
 - c. MAP Owned Materiel (MAPOM) (Block 1.2)
- (1) <u>Description</u>. This sub-function concerns MAPOM items which should be the first considered in fulfilling an IL requirement. The availability of these items eliminate the need for programming additional items and also prevents duplicate stocks within the ALS.

- (2) <u>Responsibility</u>. The Directors of International Logistics at the MSC's are responsible for managing MAPOM.
- (3) <u>Interfaces</u>. The analysis identified twenty-three (23) interfaces necessary to perform this sub-function.
- (a) <u>Valid Interfaces</u>. Twenty (20) interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. The analysis identified three (3) interface voids. The voids are listed below:
 - AVSCOM Director of International Logistics
 - 2 MICOM Director of Materiel Management
 - 3 TARCOM Director of Materiel Management
 - (d) Critical Interfaces.
 - 1 Directors of International Logistics at the MSC's
 - 2 Directors of Materiel Management at the MSC's
 - 3 COMSEC Logistics Agency, ECOM
 - d. Excesses to Requisitioning Objective (RO) (Block 1.3)
- (1) <u>Description</u>. This sub-function involves material which is excess to the RO of using units/agencies/elements which must be considered to insure proper utilization or disposal. Therefore, these stocks should be considered for use in fulfilling IL requirements in lieu of procurement or rebuild.
- (2) <u>Responsibility</u>. The responsibility for this sub-function is delegated to the Directors of Materiel Management at each MSC.
- (3) <u>Interfaces</u>. Ten (10) interfaces were identified as necessary in the performance of this sub-function.
- (a) <u>Valid Interfaces</u>. All interfaces identified, ten (10), were determined to be valid and performing.

- (b) <u>Duplicate Interfaces</u>. None
- (c) Voids. None
- (d) <u>Critical Interfaces</u>. All interfaces identified are considered critical to this sub-function.
 - e. Major Items for MAP From Long Supply or Excess (MIMEX) (Block 1.4)
- (1) <u>Description</u>. This sub-function involves the use of items in fulfilling ILP requirements (MAP) from major items offered by DSAA and transferred to specific grant aid recipients at no cost to MAP appropriations except for packing, crating, handling and transportation. Such assets are deliverable only on the issuance of a DOD MAP order by DSAA. The MIMEX System is one of the specific systems established to make more effective use of this type of materiel.
- (2) <u>Responsibility</u>. The primary responsibility for this sub-function is delegated to the Director for Program Management, WFO, USAILCOM. Responsibility for this sub-function within the MSC's is delegated to the Directors of International Logistics and Materiel Management.
- (3) <u>Interfaces</u>. Twenty-five (25) interfaces were determined necessary in the performance of this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis revealed twenty-three (23) interfaces as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Two (2) interface voids were identified in this sub-function. The voids are:
 - 1 U.S. Army Medical Materiel Agency
 - 2 Director of International Logistics, MICOM
 - (d) Critical Interfaces.

- 1 DSAA
- 2 U.S. Army Medical Materiel Agency
- 3 Director for Program Management, WFO, USAILCOM
- 4 Directors of International Logistics at the MSC's
- 5 Directors of Materiel Management at the MSC's
- f. Disposal (Block 1.5)
- (1) <u>Description</u>. This sub-function is concerned with the use of items that are earmarked for disposal to fulfill IL requirements. It is to be used as a last resort type of action and used only if the cost to restore or modify the item is determined economically feasible.
- (2) <u>Responsibility</u>. The responsibility for this sub-function is delegated to the Directors of Materiel Management at the MSC's, who should work in close coordination with the Directors of Maintenance.
- (3) <u>Interfaces</u>. Forty (40) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. The analysis revealed thirty (30) of the interfaces to be valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Ten (10) interface voids were identified in the analysis. The voids are listed below:
 - 1 DLSC
 - 2 U.S. Army Medical Materiel Agency
 - 3 Directors of International Logistics at

ARMCOM

ECOM

MICOM

TARCOM

4 Directors of Maintenance at:

ARMCOM

MICOM

TROSCOM

- (d) Critical Interfaces.
- 1 DOD
- 2 DSAA
- 3 MAAGS and Missions
- 4 DLSC
- 5 DPDS
- 6 Director for Program Management, WFO, USAILCOM
- 7 Directors of International Logistics at the MSC's
- 8 Directors of Materiel Management at the MSC's
- 9 Directors of Maintenance at the MSC's
- g. Due-In (Block 1.6)
- (1) <u>Description</u>. This sub-function concerns the consideration of materiel due-in from any source to fulfill IL requirements, and eliminate procurement or rebuild directives.
- (2) <u>Responsibility</u>. The responsibility for this sub-function is delegated to the Directors of Materiel Management at the MSC's.
- (3) <u>Interfaces</u>. Fifty-nine (59) interfaces were identified as necessary within this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis revealed forty-seven (47) interfaces as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None

- (c) <u>Voids</u>. Twelve (12) interface voids were identified in the analysis. The voids are:
 - 1 Director of International Logistics, TROSCOM
 - 2 Directors of Procurement and Production:

ARMCOM

AVSCOM

ECOM

MICOM

TARCOM

TROSCOM

- 3 Small Business Office, TARCOM
- 4 Project Managers:

ARMCOM

AVSCOM

TROSCOM

- 5 Army Depots
- (d) <u>Critical Interfaces</u>. Because of the importance of this sub-function all interfaces identified are considered critical.
 - h. Interchangeability/Substitutability (Block 1.7).
- (1) <u>Description</u>. This sub-function involves the consideration of substitute or interchangeable items when the items requested by a recipient government are not available.
- (2) <u>Responsibility</u>. The Director of Materiel Management at the MSC's have the responsibility for this sub-function. However, this responsibility is shared with the Directors of RD&E and Maintenance in order to assure that the substitute or interchangeable items will fulfill the same roll/mission

as the prime item requested. The substitution or interchange of an item must be coordinated with the Unified Commands, MAGGS and Missions, and the recipient country.

- (3) <u>Interfaces</u>. The analysis identified sixty-four (64) interfaces necessary to perform this sub-function.
- (a) <u>Valid Interfaces</u>. Twenty-three (23) of the interfaces were determined valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. The analysis revealed forty-one (41) interface voids in this sub-function. They are:
 - 1 Country
 - 2 Unified Commands
 - 3 MAAGS and Missions
 - 4 Director for International Logistics, HQ DARCOM
 - 5 Director for Materiel Management, HQ DARCOM
 - 6 Associate Director for Maintenance, HQ DARCOM
 - $\underline{7}$ Director for Development and Engineering, HQ DARCOM
 - 8 Major Subordinate Commands

ARMCOM

Safety Office

- (d) <u>Critical Interfaces</u>. Due to the importance of this sub-function all interfaces are considered critical.
 - i. Overhaul/Rebuild (Block 1.8)
- (1) <u>Description</u>. This sub-function considers the output of overhaul/ rebuild as a potential source of fulfilling International Logistics requirements.
- (2) <u>Responsibility</u>. The Director of Materiel Management has the responsibility to initiate overhaul/rebuild requirements. He accomplishes this in coordination with the Director of Maintenance. The MIDA has the depot workloading responsibility for overhaul/rebuild.
- 3. <u>Interfaces</u>. Sixty-three (63) interfaces were identified as necessary to fulfill this sub-function requirement.
- (a) <u>Valid Interfaces</u>. The analysis identified forty-seven (47) of the interfaces as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Interface Voids</u>. Sixteen (16) interface voids were identified. They are:
 - 1 Major Subordinate Commands:

ARMCOM

Director of International Logistics
Comptroller

Safety Office

Armaments Systems Office

AVSCOM

Director of International Logistics

ECOM

Project Managers

TROSCOM

Director of International Logistics

Comptroller

Safety Office

Field Service Activity

- 2 General Services Administration
- (d) <u>Critical Interfaces</u>. The nature of this sub-function requires close coordination; therefore, all interfaces are considered critical.
 - j. Procurement (Block 1.9)
- (1) <u>Description</u>. This sub-function involves the procurement of new items to fulfill ILP requirements when all other sources discussed in the preceding sub-functions for requirements execution fail to produce the required items.

- (2) Responsibility. When all other sources fail to provide the items needed to fulfill ILP requirements, the Directors of Materiel Management at the MSC's have the responsibility to initiate procurement work directives (PWD) for the items required. Based upon the PWD's, it then becomes the responsibility of the Directors of Procurement and Production at the MSC's to take procurement action.
- (3) <u>Interfaces</u>. Ninety-one (91) interfaces were identified as necessary for this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis identified seventy (70) interfaces as valid and performing within this sub-function.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Twenty-one (21) interface voids were identified in this sub-functions. They are listed below:
 - 1 Major Subordinate Commands

ARMCOM

Director of RD&E

Director of Maintenance

Director of Management Information Systems

Project Managers

Safety Office

Armament Systems Office

AVSCOM

Director of Management Information Systems

- 8 Director for Procurement and Pro tion, HQ DARCOM
- 9 All elements of the MSC's listed in the matrix.
- 10 Private Industry
- 11 GSA
- k. Concurrent Spare Parts (Block 2.0)

- (1) <u>Description</u>. This function concerns the spare parts that are to be furnished a recipient country when an item of equipment is furnished for the first time. Newly introduced items must be accompanied by a one (1) year supply of spare parts.
- (2) Responsibility. Responsibility for the centralized control of concurrent spare parts is delegated to the Director for Program Operation, USAILCOM, NCAD. The Directors of International Logistics and Materiel Management at the MSC's have responsibility to furnish concurrent spare parts for items under their cognizance.
- (3) <u>Interfaces</u>. The analysis identified forty-eight (48) interfaces required in the performance of this function.
- (a) <u>Valid Interfaces</u>. Thirty-seven (37) of the interfaces identified were considered valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Eleven (11) interface voids were identified in the analysis. Listed below are the voids identified:
 - Major Subordinate Commands
 ARMCOM
 Director of International Logistics
 Director of Maintenance
 Armament Systems Office
 ECOM

Director of Maintenance
Director of Procurement and Production
Special Items Management Office
COMSEC Logistics Agency

MICOM

Director of International Logistics

- 11 Director for Program Operations, NCAD, USAILCOM
- 12 Director for Regional Operations, NCAD, USAILCOM
- 13 All elements of the MSC's listed in the matrix
- 14 GSA
- Publications (Block 3.0)
- (1) <u>Description</u>. This function involves furnishing the publications requested in FMS cases to countries participating in the ILP.
- (2) Responsibility. The responsibility for processing requests for publications within the ILP is delegated to the Directors for Program and Regional Management, WFO, USAILCOM, and the Directors for Program and

Regional Operations, WFO, USAILCOM. The Directors of Maintenance at the MSC's also have a responsibility for coordination for publications governing items for which they have responsibility. The Adjutant General, DA, is responsible for obtaining and shipping publications.

- (3) <u>Interfaces</u>. Sixty-nine (69) interfaces were identified as necessary in the performance of this function.
- (a) <u>Valid Interfaces</u>. The analysis identified fifty-one (51) interfaces as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Eighteen (18) interface voids were identified within this function. The voids are:
 - 1 Major Subordinate Commands

ARMCOM

Director of Materiel Management

Director of RD&E

Director of Product Assurance

Safety Office

- 12 Director for Regional Operations, NCAD, USAILCOM
- 13 All Elements of the MSC's listed in the matrix.
- m. Loan of Equipment (Block 4.0)

- (1) <u>Description</u>. This function involves providing items of equipment to accredited foreign countries on a loan basis for the purpose of temporary use or for R&D purposes.
- (2) <u>Responsibility</u>. The Director for Regional Management, WFO, USAILCOM, has the primary responsibility within this function. However, the Directors of International Logistics, Materiel Management and RD&E at the MSC's have a responsibility relative to items under their cognizance.
- (3) <u>Interfaces</u>. The analysis identified thirty-one (31) interfaces considered necessary within this function.
- (a) <u>Valid Interfaces</u>. Seventeen (17) of the interfaces were determined to be valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Fourteen (14) interface voids were identified in the analysis. The voids are:
 - 1 Director of Materiel Management, HQ DARCOM
 - 2 Major Subordinate Commands

- 5 Director for Regional Management, WFO, USAILCOM
- 6 All elements of the MSC's listed in the matrix.
- n. Purpose Code Assignment/Coordination (Block 5.0)
- (1) <u>Description</u>: This function involves the assignment and coordination of purpose codes to items of material to be utilized in the ILP. Purpose codes preclude items from being used to fulfill a requirement for any purpose other than that for which they are specifically designated.
- (2) <u>Responsibility</u>. Based upon official instructions from higher echelons, the Directors of International Logistics and Materiel Management are responsible for the development and assignment of purpose codes.
- (3) <u>Interfaces</u>. The analysis identified fourteen (14) interfaces necessary in the performance of this function.
- (a) <u>Valid Interfaces</u>. Seven (7) interfaces were determined valid and performing.
 - (b) Duplicate Interfaces. None
 - (c) Voids. The analysis identified seven (7) interface voids. They are:

- 1 DSAA
- <u>2</u> Director for International Logistics, HQ DARCOM
- 3 Director for Materiel Management, HQ DARCOM
- 4 Director for Program Management, WFO, USAILCOM
- 5 Director for Regional Management, WFO, USAILCOM

- 5 Director for Program Operations, NCAD, USAILCOM
- 6 Director for Regional Operations, NCAD, USAILCOM
- 7 Directors of Materiel Management, at all MSC's.
- o. Supportability Plan/Statement (Block 6.0)
- (1) <u>Description</u>. This function provides a plan or statement to support equipment transferred to a recipient country on a MAP or FMS basis. The plan must also include authorized stockage and load lists to support the items.
- (2) <u>Responsibility</u>. The primary responsibility for the preparation of supportability plans/statements is delegated to the Directors of International Logistics and Materiel Management at the MSC's.
- (3) <u>Interfaces</u>. Fifty-five (55) interfaces were identified as necessary to perform this function.

- (a) <u>Valid Interfaces</u>. The analysis identified thirty-six (36) of the interfaces as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Nineteen (19) interface voids were identified in the analysis. The voids are:
 - 1 Major Subordinate Commands

Director of Materiel Management

Director of RD&E

Director of Procurement and Production

Director of Product Assurance

Armament System Office

MICOM

Director of Materiel Management

Director of RD&E

Director of Procurement and Production

- (1) <u>Description</u>. This function concerns the development of the International Logistics Supply Delivery Plan which contains all items listed in IL cases and scheduled for delivery. This plan assists in insuring that ILP items are not diverted to other requirements.
- (2) Responsibility. The Director for Program Management, WFO, USAILCOM, has the responsibility for directing, supervising and evaluating the ILSDP.

 The Directors of International Logistics and Materiel Management at the MSC's are responsible for developing the ILSDP data for items within their commodity responsibility.
- (3) <u>Interfaces</u>. Fifty-nine (59) interfaces were identified as necessary within this function.

- (a) <u>Valid Interfaces</u>. The analysis identified twenty-seven (27) interfaces as valid and performing.
 - (b) Duplicate Interfaces. None.
- (c) <u>Voids</u>. Thirty-two (32) interface voids were identified within this function. They are:

- q. Requisition Processing (Block 8.0)
- (1) <u>Description</u>. This function concerns the processing of requisitions for MAP and FMS cases. The function is performed at NCAD, USAILCOM and at all MSC's.
- (2) Responsibility. The Director of Program Operations, NCAD, USAILCOM, has responsibility for the centralized control for all requisitions entering the ILP and referring them to the appropriate supply sources. He also has responsibility to process requisitions to DSA and GSA. The Directors of International Logistics and Materiel Management at the MSC's have responsibility for processing ILP requisitions received by their commands.
- (3) <u>Interfaces</u>. Thirty-six (36) interfaces were identified as necessary in the performance of this function.
- (a) <u>Valid Interfaces</u>. The analysis identified twenty-seven (27) as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Nine (9) interface voids were identified within the function. Listed below are the voids:

- (d) <u>Critical Interfaces</u>. All interfaces identified are considered critical within this function.
 - r. Quality/Product Control (Block 9.0)
- (1) <u>Description</u>. This function insures that all equipment shipped to recipient countries is of a quality to assure proper functioning and longevity.
- (2) <u>Responsibility</u>. The primary responsibility within this function is delegated to the Director for Quality Assurance, WFO, USAILCOM. The Directors of Quality Assurance within the MSC's have the responsibility to perform the QA inspections at depots, manufacturers plants, and at destinations in accordance with policy and procedural guidance from USAILCOM.
- (3) <u>Interfaces</u>. The analysis identified sixty-two (62) interfaces necessary within this function.
- (a) <u>Valid Interfaces</u>. Forty-five (45) of the interfaces were determined to be valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Seventeen (17) voids were identified in the analysis. The voids are listed below:
 - 1 DSAA

- (d) <u>Critical Interfaces</u>. All interfaces identified for this function are considered critical.
 - s. Issue (Block 10.0)
- (1) <u>Description</u>. This function concerns the actions taken by a depot upon issue of items for the ILP.
 - (2) Responsibility. This function is the responsibility of Army Depots.
- (3) <u>Interfaces</u>. Six (6) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. All six (6) interfaces are considered valid and performing.

- (b) No interface duplications or voids were identified.
- (c) Critical Interfaces.
- 1 DSA
- 2 U.S. Army Medical Materiel Agency
- 3 Depots
- 4 GSA
- 5 CONSEC Log Agency
- t. Transfer of Title (Block 10.1)
- (1) <u>Description</u>. This sub-function concerns the transfer of title of U.S. equipment furnished through the ILP. Title for items furnished from stock is transferred at the depot point of storage or other designated points if the shipment moves by freight forwarder. If the shipment is to move through the DOD transportation system, the title is transferred at the point specified in the terms of sale (FOB Port of Loading, FOB Port of Discharge, FOB Destination, etc.). If the equipment is furnished from procurement and moved by freight forwarder, title is transferred at the manufacturer's plant. If items from procurement are to move via the DOD Transportation System, the transfer of title is dictated by the terms of sale specified in the contract and occur as explained for items furnished from stock.
- (2) <u>Responsibility</u>. The responsibility to accomplish the transfer of title on items furnished from stock is delegated to the appropriate Depot Commander. Title transfer for items furnished from procurement is the responsibility of the appropriate procurement activity.
- (3) <u>Interfaces</u>. Nine (9) interfaces were identified as necessary in the performance of this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis identified seven (7) of the interfaces as valid and performing.

- (b) Duplicate Interfaces. None
- (c) Voids. Two (2) voids were identified by the analysis. They are:
- 1 COMSEC Logistics Agency
- 2 GSA
- (d) Critical Interfaces
- 1 DOD
- 2 Country
- 3 DSA
- 4 GSA
- u. Export License (Block 10.2) (Munitions Only)
- (1) <u>Description</u>. This sub-function involves obtaining the required license to export munitions from the United States.
- (2) <u>Responsibility</u>. The responsibility to issue the export license is delegated to the Department of State. However, it is the responsibility of the Directors of International Logistics at each appropriate major subordinate command to initiate the request for items under their cognizance.
- (3) <u>Interfaces</u>. Twenty-one (21) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. Eleven (11) of the interfaces were considered valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. The analysis identified ten (10) interface voids in the sub-function. They are:
 - Directors of International Logistics at:

AVSCOM

ECOM

MICOM

TARCOM

TROSCOM

2 Project Managers at:

ECOM

TARCOM

- 3 Weapons System Management Office, AVSCOM
- 4 Armaments System Office, ARMCOM
- (d) <u>Critical Interfaces</u>. All interfaces identified are considered critical to this sub-function.
 - v. Packing/Crating/Handling Policy (Block 11.0)
- (1) <u>Description</u>. This function involves the development of packing/crating/handling policy and procedures to insure the delivery of items in a ready to use and undamaged condition.
- (2) <u>Responsibility</u>. The responsibility for the development of packing/crating/handling policy is delegated to the DARCOM Packaging, Storage and Containerization Center.
- (3) <u>Interfaces</u>. Fifty-eight (58) interfaces were identified as necessary in the performance of this function.
- (a) <u>Valid Interfaces</u>. The analysis identified thirty-two (32) interfaces valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Twenty-six (26) interface voids were identified in the analysis. The voids are:
 - 1 DA

- 2 U.S. Army Medical Materiel Agency
- 3 Major Subordinate Commands:

Director of International Logistics

Director of Materiel Management

Director of Maintenance

Director of RD&E

Director of Procurement and Production

- 9 DARCOM Packaging, Storage and Containerization Center
- w. Shipping (Block 12.0)
- (1) <u>Description</u>. This function encompasses all of the aspects involved in the shipment of materiel to recipient countries in the ILP. ILP items are shipped from Army Depots and from points of manufacture.
- (2) <u>Responsibility</u>. The primary responsibility for the shipment of items from army points of storage is the shipping depot. However, the MSC's furnish advice on special handling and routing. Shipments from points of manufacture are governed by the Provisions of Procurement contracts as they relate to all aspects of shipping.

- (3) <u>Interfaces</u>. Fifty-six (56) interfaces were identified as necessary within this function.
- (a) <u>Valid Interfaces</u>. The analysis identified thirty-seven (37) interfaces as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Nineteen (19) interface voids were identified in this function. The voids are:
 - 1 U.S. Army Medical Materiel Agency
 - 2 Major Subordinate Commands:

- x. Freight Forwarders (Block 12.1)
- (1) <u>Description</u>. This sub-function concerns the shipment of IL items by a freight forwarder, who acts as an agent for the recipient country. Shipments via freight forwarder originate from Army Depots, places of manufacture, or other points designated by the recipient country such as port of exit, etc.
- (2) <u>Responsibility</u>. The freight forwarder is solely responsible for the shipment from the point of title transfer to delivery to ultimate destination. However, the Director for Transportation and Traffic Management, NCAD, USAILCOM,

has the responsibility to monitor freight forwarder performance.

- (3) <u>Interfaces</u>. Twenty-three (23) interfaces were identified as necessary within this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis identified ten (10) interfaces as valid and performing within this sub-function.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Thirteen (13) interface voids were identified and are shown below:

 - y. Defense Transportation System (Block 12.2)

- (1) <u>Description</u>. This sub-function concerns the movement of IL items to recipient countries through the Defense Transportation System.
- (2) <u>Responsibility</u>. The Military Traffic Management Command is responsible for the movement of items through the DOD Transportation System. However, the depots are responsible to initiate action in accordance with MILSTRIP for shipments from storage, and the appropriate procurement agency is responsible to initiate action on items from manufacturer's plant in accordance with the terms of the contracts.
- (3) <u>Interfaces</u>. Thirty-one (31) interfaces were considered necessary in the performance of this sub-function.
- (a) <u>Valid Interfaces</u>. The analysis identified eight (8) interfaces valid and performing.
 - (b) Duplicate Interfaces. None
- (c) Voids. Twenty-three (23) interface voids were identified in the sub-function. The voids are:
 - 1 The Adjutant General
 - 2 U.S. Army Medical Materiel Agency
 - 3 The Military Traffic Management Command

- z. Technical Data Packages (Block 13.0)
- (1) <u>Description</u>. This function involves the preparation, maintenance, storage and furnishing technical data relative to items of equipment shipped to recipient countries.
- (2) <u>Responsibility</u>. The responsibility for the preparation of the technical data package is delegated to the Directors of RD&E, Materiel Management, Procurement and Production, Maintenance and Product Assurance at all MSC's except TROSCOM. The Director of Management Information Systems, TROSCOM, has responsibility of all aspects of technical data packages. However, the Directors of Management Information Systems at the other MSC's have responsibility only for storage and retrieval of technical data packages.
- (3) <u>Interfaces</u>. The analysis identified seventy-eight (78) interfaces necessary within this function.
- (a) <u>Valid Interfaces</u>. Fifty-four (54) interfaces were determined valid and performing in this functional area.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Twenty-four (24) interface voids were identified. The voids are:

- bb. Delivery/Billing (Block 15.0)
- (1) <u>Description</u>. This function concerns the delivery of items and the billing of the recipient country to recover all U.S. expenditures in connection with the IL case.
- (2) <u>Responsibility</u>. The delivery of materiel is the responsibility of the Military Traffic Management Command and the freight forwarder dependent upon the terms of sale. The responsibility for billing commences with the Directors of International Logistics and the Comptrollers of the MSC's. The final billing process is the responsibility of the Comptroller, NCAD, USAILCOM.
- (3) <u>Interfaces</u>. Thirty-six (36) interfaces were determined necessary in the performance of this function.
- (a) <u>Valid Interfaces</u>. The analysis identified thirty-four (34) interfaces as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Two (2) interface voids were identified in this function. They are:

ANNEX G

FUNCTIONAL CATEGORY VII

TITLE: Support Services

- 1. <u>Purpose</u>: This annex presents the support services required within the DARCOM portion of the International Logistics Program. Appendix 1 indicates those portions of the Army Logistics System into which they are integrated or require interface. The interfaces required by each service are presented in Appendix 2.
- 2. <u>General</u>: The functions outlined in this annex were identified as necessary to support all of the functional areas of the DARCOM IL program. Listed below are the functions addressed:
 - a. Management Information Systems (Block 1.0)
 - b. ADP Support (Block 2.0)
- c. <u>Centralized Integrated System International Logistics (CISIL)</u>(Block 3.0)
 - d. Military Articles and Services List (MASL) (Block 4.0)
 - e. Foreign Military Sales Data Book (Block 5.0)
 - f. Training (Block 6.0)
 - g. Studies/Study Program (Block 7.0)
 - h. Security (Block 8.0)
 - (1) Physical Security (Block 8.1)
 - (2) Classification (Block 8.2)
 - (3) Accreditation (Block 8.3)
 - i. New Equipment Training (Block 9.0)
 - j. Logistics Assistance (Block 10.0)

3. Discussion:

- a. Management Information Systems (Block 1.0)
- (1) <u>Description</u>. This function is concerned with the U. S. Army IL Command Management Information System and the development of DARCOM supporting systems and procedures. It also is concerned with the integration of IL MIS requirements into established MILSTANDARD and other developed systems that support the DARCOM IL program.
- (2) <u>Responsibility</u>. The primary responsibility for this function is delegated to the Director for Management Information Systems, USAILCOM (NCAD). However, he is assisted by his counterparts and other functional directors throughout the DARCOM complex having IL responsibilities and a need for MIS support.
- (3) <u>Interfaces</u>. The analysis identified a requirement of seventy-two (72) interfaces to fulfill this function.
- (a) <u>Valid Interfaces</u>. Thirty-two (32) interfaces were identified as valid and performing within the function.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. During the analysis, forty (40) interface voids were identified.
 - 1 Major Subordinate Commands

- 2 Army Depots
- (d) <u>Critical Interfaces</u>. The critical interfaces identified for this function are:
 - 1 Director of MIS, USAILCOM (NCAD)
 - 2 Directors of MIS, DARCOM MSCs
 - 3 Army Depots
 - b. ADP Support (Block 2.0)
- (1) <u>Description</u>. This function encompasses software and peripheral equipment support (keypunch-remote stations, etc.) required to support those IL functions or portions thereof required for the DARCOM IL program.

- (2) <u>Responsibility</u>. The responsibility within this function rests primarily with the Directors of MIS at USAILCOM and the MSCs. However, the functional areas involved in IL also have a support and coordinating responsibility.
- (3) <u>Interfaces</u>. Fifty (50) interfaces were identified as necessary to perform this support function.
- (a) <u>Valid Interfaces</u>. The analysis identified twenty-nine (29) valid interfaces required for this function and being performed.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Interface voids identified within this function were twenty-one (21). Listed below are the voids:
 - 1 Major Subordinate Commands

ARMCOM

Director of RD&E

Comptroller

Director of Procurement and Production

AVSCOM

Director of IL

Director of Maintenance

Director of RD&E

Comptroller

Director of Procurement and Production

ECOM

TROSCOM

Director of RD&E

- 2 Depots
- (d) Critical Interfaces.
- 1 Director of MIS, USAILCOM (NCAD)
- 2 Directors of MIS, DARCOM MSCs
- c. <u>Centralized Integrated System International Logistics (CISIL)</u>
 (Block 3.0)
- (1) <u>Description</u>. This system is under development, and is an effort to standardize international logistics within DARCOM. It is to insure that DARCOM fulfills its mission in support of U. S. foreign assistance legislation, DOD objectives and policy in the most efficient and economical manner. It has been developed to integrate all elements of DARCOM, whose mission involves the control, supply, and billing of the IL program. The

system is designed to eliminate the duplication of records, reduce manual operations, and provide for execution of IL requirements in a timely and efficient manner.

(2) <u>Responsibility</u>. The Director of MIS, USAILCOM (NCAD), has the primary responsibility to maintain and monitor the automated CISIL System DARCOM-wide, and to provide system and procedural guidance to all command elements. The Directors of MIS, assisted by appropriate functional elements of the DARCOM MSCs, also have a responsibility to support the Director of MIS, USAILCOM (NCAD), in his responsibility relative to CISIL.

(3) Interfaces.

- (a) The mission and functions manuals used in the analysis were of a vintage that did not recognize the CISIL System except in five (5) instances (HQ DARCOM, USAILCOM, AVSCOM, MICOM, and ECOM). Therefore, only five (5) interfaces were discernable as established and functioning. However, available documents relative to CISIL used in the analysis indicated, based on study team judgment, that approximately sixty-three (63) interfaces are required to fully develop the CISIL System in accomplishing the functions listed in the description outlined above.
- (b) Inasmuch as the CISIL System is not now a functioning system, the interfaces identified in the analysis were judgmental on the part of the study team. Therefore, no listing as to valid, duplicative, void or critical interfaces can be accurately developed. Listed below are the interfaces that are considered necessary in the development and installation of the CISIL System.

1 HQ DARCOM

Director for IL

Director for Materiel Management

Director for Plans and Analysis

Director for Readiness

Director for Plans, Doctrine and Systems

Director for MIS

Director for Personnel, Training and Force Development

2 USAILCOM

WFO

Director for Program Management

Director for Regional Management

Director for Plans, Systems and Analysis

NCAD

Director for MIS

Director for Program Operations

Director for Regional Operations

Director for Transportation and Traffic Management

Comptroller

3 Major Subordinate Commands

Directors of IL

Directors of Materiel Management

Directors of Maintenance

Directors of RD&E

Comptrollers

Directors of Procurement and Production

Directors of MIS

Directors of Product Assurance

- d. Military Articles and Services List (Block 4.0)
- (1) <u>Description</u>. This function concerns the development and updating of the Military Articles and Services List (MASL) which is used for IL planning by MAAGS and missions.
- (2) Responsibility. The primary responsibility for this function is delegated to the Director for Program Management, WFO, USAILCOM, who directs, supervises and evaluates actions relative to the input to the MASL, and provides guidance to the MSCs for MASL input to the DOD. The Directors of IL and Materiel Management within the MSCs are responsible to prepare and submit the MASL data.
- (3) <u>Interfaces</u>. Eighteen (18) interfaces were identified as necessary to fulfill this functional responsibility.
- (a) <u>Valid Interfaces</u>. Eleven (11) interfaces were identified as valid and are performing within this function.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Seven (7) interface voids were identified for this function. The voids are identified below:
 - 1 U. S. Army Medical Materiel Agency
 - 2 Major Subordinate Commands

ARMCOM

Director of Materiel Management

AVSCOM

Director of Materiel Management

ECOM

Director of Materiel Management
COMSEC Logistics Agency

TACOM

Director of Materiel Management

TROSCOM

Director of Materiel Management

- (d) <u>Critical Interfaces</u>. The currency of the MASL is considered to be of the utmost importance. Therefore, all interfaces indicated in the matrix are considered critical.
 - e. Foreign Military Sales Data Book (Block 5.0)
- (1) <u>Description</u>. This function is concerned with the Foreign Military Sales Data Book, which is the official U. S. Army reference for use in estimating and planning sales to foreign purchasers. It is prepared in two volumes by the MSCs. Volume I contains U. S. Army standard items supportable from U. S. Army sources for specific periods of time. Volume II contains R&D data on material expected to be standardized (type classified) within two years. Data sheets in Volume II are provided for U. S. personnel only and cannot be released to foreign governments without specific authority from Commander, DARCOM, on a case by case basis. The FMS Data Book is updated semiannually.
- (2) <u>Responsibility</u>. The MSCs are responsible for preparation and distribution of data book sheets. The Director of Program Management, WFO, USAILCOM, directs, supervises and evaluates the preparation, publication, distribution and continued maintenance of the U. S. Army FMS Data Book.

- (3) <u>Interfaces</u>. The analysis of this function identified twenty-one(21) interfaces required to perform this function.
- (a) <u>Valid Interfaces</u>. Eight (8) interfaces were identified as valid and performing within this function.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Thirteen (13) interface voids were identified in the analysis of this function. Listed below are the interfaces considered voids:
 - 1 U. S. Army Medical Materiel Agency
 - 2 Major Subordinate Commands

ARMCOM

Director of Materiel Management

Director of RD&E

AVSCOM

Director of IL

Director of Materiel Management

Director of RD&E

ECOM

Director of RD&E

COMSEC Logistics Agency

MICOM

Director of Materiel Management

Director of RD&E

TACOM

Director of RD&E

TROSCOM

Director of Materiel Management

Director of RD&E

- (d) <u>Critical Interfaces</u>. Because of the nature of the data contained in the FMS Data Book and its importance, all interfaces identified in the matrix are considered critical.
 - f. Training (Block 6.0)
- (1) <u>Description</u>. For the purposes of this study, the function of training concerns only the training of foreign nationals in the various functional areas of logistics. New equipment training is addressed as a separate function.
- (2) <u>Responsibility</u>. The coordination and supervision of the training of foreign nationals is the responsibility of the Director for Personnel, Training and Force Development, HQ DARCOM. The actual conduct of training within the wholesale level is delegated to the Commandants and heads of DARCOM educational activities (ALMC, AMETA, etc.). The Commander, TRADOC, through his appropriate school Commandants, is responsible for the training at the retail level.
- (3) <u>Interfaces</u>. During the analysis of this function, thirty-one (31) interfaces were identified as necessary to fulfill this functional responsibility.
- (a) <u>Valid Interfaces</u>. Ten (10) interfaces were identified as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
 - (c) Voids. Twenty-one (21) interface voids were identified. Listed

below are the voids:

Major Subordinate Commands

ARMCOM

Director of Materiel Management

Comptroller

- (d) <u>Critical Interfaces</u>. To assure that training of foreign nationals encompasses all functional areas relative to items/services sold on FMS cases, all interfaces identified are considered critical.
 - g. <u>Studies/Study Program (Block 7.0)</u>
- (1) <u>Description</u>. This function includes the establishment of a study program and the accomplishment of the studies contained therein that are necessary to develop new and improved techniques and procedures to enhance the ILP.
- (2) <u>Responsibility</u>. The Director of Plans, Systems and Analysis, WFO, USAILCOM, has the primary responsibility for this function. Accomplishment of the studies is delegated to those agencies designated by USAILCOM. However, the appropriate functional elements of all DARCOM activities contribute to the study effort.
- (3) <u>Interfaces</u>. Seventy-three (73) interfaces were identified as participating in this function when the topic to be studied is appropriate to them. However, the Director, Plans, Systems and Analysis, WFO, USAILCOM, has the only continuing activity in this function.
- (a) <u>Valid Interfaces</u>. Fifty-six (56) of the interfaces identified are established and performing.
 - (b) <u>Duplicate Interfaces</u>. None

(c) <u>Voids</u>. Seventeen (17) voids were identified for this function. Listed below are the voids identified:

Major Subordinate Commands

ARMCOM

Director of RD&E

Director of MIS

Project Managers

AVSCOM

Director of IL

Project Managers

ECOM

Director of Maintenance

Director of Procurement and Production

Project Manager

MICOM

Project Managers

Director of Personnel, Training and Force Development

Director of IL

Director of Personnel, Training and Force Development

TROSCOM

Director of RD&E

Comptroller

Director of Product Assurance

Project Managers

Director of Personnel, Training and Force Development

- (d) <u>Critical Interfaces</u>. No critical interfaces can readily be identified for this function. Interfaces become critical when the study topic involves a particular element/activity.
 - h. Security (Blocks 8.0, 8.1, 8.2, 8.3)
- (1) <u>Description</u>. This function encompasses both the physical security of equipment and facilities, and the classification of equipment and documentation within the IL procedure. It also includes the security clearance of U. S. civilians and foreign nationals concerned with IL.
- (2) <u>Responsibility</u>. Under the provisions of appropriate Army Regulations (380 series), each command/element/activity/organization dealing with classified matters/material/documents have the responsibility to classify those things/items they originate and any items they use or handle.
- (3) <u>Interfaces</u>. Sixty-eight (68) interfaces were identified as required to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. The analysis of this function revealed twenty-seven (27) interfaces as valid and performing.
 - (b) <u>Duplicate Interfaces</u>. None
- (c) <u>Voids</u>. Forty-one (41) voids were identified within this function. Listed below are the voids:
 - Director for Program Operations, NCAD, USAILCOM
 - 2 Director for Regional Operations, NCAD, USAILCOM
 - 3 Major Subordinate Commands

ARMCOM

Director of IL

Director of Maintenance

Director of RD&E

Director of Procurement and Production

Director of MIS

Project Managers

Director of Personnel, Training and Force Development

AVSCOM

- 4 Army Depots
- (d) <u>Critical Interfaces</u>. Inasmuch as security violations can result in serious consequences if any interface is not performed, all interfaces are considered critical.
 - i. New Equipment Training (Block 9.0)
- (1) <u>Description</u>. This function concerns the training for the proper operation and maintenance of new equipment being introduced into a foreign country. It is normally accomplished by new equipment training teams being dispatched to the recipient country.
 - (2) Responsibility. New equipment training and the conduct thereof

is the primary responsibility of the Directors of Maintenance of the MSCs. However, coordination and staff supervision of the training rests with the Director, Personnel, Training and Force Development, HQ DARCOM; the Director for Program Management, WFO; and the Directors for Program and Regional Operations, USAILCOM (NCAD). Additionally, the Project Managers and Directors of Personnel, Training and Force Development of the MSCs also participate in this function.

- (3) <u>Interfaces</u>. Thirty-one (31) interfaces were identified to fulfill this functional requirement.
- (a) <u>Valid Interfaces</u>. Sixteen (16) interfaces were identified as valid and performing within this function.
 - (b) Duplicative Interfaces. None
- (c) <u>Interface Voids</u>. The analysis of this function indicated fifteen (15) voids. Listed below are the voids:

Major Subordinate Commands

ARMCOM

Director of IL

Project Managers

AVSCOM

Director of IL

Project Managers

Director of Personnel, Training and Force Development

Director of Personnel, Training and Force Development

(d) Critical Interfaces

1 HQ DARCOM

Director for Personnel, Training and Force Development

2 USAILCOM, NCAD

Director for Program Operations

Director for Regional Operations

3 Major Subordinate Commands

Directors of IL

Directors of Maintenance

Directors of Personnel, Training and Force Development

- j. Logistics/Technical Assistance (Block 10.0)
- (1) <u>Description</u>. This function provides assistance to recipient countries relative to equipment operation and maintenance, and other operational logistical problems relative to the logistics functions within their military forces.

- (2) <u>Responsibility</u>. The primary responsibility is delegated to the appropriate staff elements of the MSCs and the DARCOM Logistics Assistance Offices. Staff cognizance responsibility rests with the Directors for Program and Regional Management, WFO, USAILCOM, and the Directors for Program and Regional Operations, USAILCOM (NCAD).
- (3) <u>Interfaces</u>. Thirty-two (32) interfaces were identified as necessary to perform this function.
- (a) <u>Valid Interfaces</u>. Thirteen (13) of the interfaces were identified as valid and performing.
 - (b) Duplicate Interfaces. None
- (c) <u>Voids</u>. Nineteen (19) interface voids were identified by the analysis of this function. Listed below are the voids:

1 USAILCOM, WFO

Director for Program Management
Director for Regional Management

2 USAILCOM, NCAD

Director of Program Operations
Director of Regional Operations

3 Major Subordinate Commands

ARMCOM

Director of Materiel Management

ANNEX H STUDY DIRECTIVE

DEPARTMENT OF THE ARMY

HEADQUARTERS UNITED STATES ARMY MATERIEL COMMAND 5001 EISENHOWER AVE., ALEXANDRIA, VA. 22304

14 AUG 1975

AMCPA-S

SUBJECT: International Logistics Studies - FY 76.

Commandant
US Army Logistics Management Center
Fort Lee, VA 23801

- 1. Reference is made to discussions between MAJ Snow (AMXMC-LSO) and Mr. D'Ambrosio (AMCIL-P/RM), subject as above.
- 2. It is requested that the Logistics Studies Office develop and submit study plans to this headquarters, ATTN: AMCPA-S, for approval prior to proceeding with the studies listed at Inclosure 1. The study plans should include:
 - a. Objective and scope of work.
 - b. Techniques to be used.
- c. Milestone chart identifying starting date, completies date, and IPR schedule.
 - d. LSO point of contact.
 - e. A statement that a literature search has been conduced.
- 3. The HQ AMC sponsor for these studies is AMCIL-P/RM, Mr. nthony D'Ambrosio, AV 284-8410. The AMCPA-S action officer is Mr. William Vanden Bosch, AV 284-9456/9.
